ACKNOWLEDGEMENT

I acknowledge with deep sense of gratitude and owe to Dr. Sushil Kumar Goel, Professor in Special Education, Regional Institute of Education [NCERT], Bhubaneswar-751 022, without whose active sterling supervision, support and personal interest this study would not have been made successful.

I am grateful to the Government of India for having permitted me to take up the study and also to conduct the study in the VRC as well as on the persons with locomotor disabilities [PLD].

I am indebted to the persons with locomotor disabilities who not only answered the SRIPLD-O honestly but also cooperated in the process of desired attitudinal change among the PLD.

I extend my most sincere thanks to different rehabilitation professionals/personnel working in rehabilitation and psychology disciplines for having agreed not only to respond enthusiastically but also to discuss various effective methods. They also agreed to discuss the research design to see the desired positive changes in those disabled persons who have negative or undesired direction and intensity of attitude.
My thanks go to Parija Library and Department of Psychology of Utkal University, Regional Institute of Education, National Institute of Rehabilitation Training and Research and Vocational Rehabilitation Centre for Handicapped for giving me the permission to use their library facilities.

I am thankful to VRC colleagues and professionals and well wisher in the field of vocational rehabilitation who helped me a lot in many other ways to complete this research work.

I am also thankful to my wife, Mrs. Chander Kanta, Daughter Ruchi Saxena and Son Sunny Saxena who has been the constant source of inspiration and their administrative assistance involved in research work.

I shall be failing in my duty if I do not extend my deep sense of gratitude to Dr. F.M.Sahu and Dr. N. C. Pati for taking personal pain, care and interest to motivate me to complete this research work.
