

CONTENTS

| Chapter No. | Title | Page No. |
|--------------------|---|-----------------|
| | List of figures | |
| | List of Tables | |
| | Notation and Terminology | |
| Chapter- 1 | INTRODUCTION | |
| 1.1 | The Power System as a Critical Infrastructure | 1 |
| 1.11 | Structural Reforms of the Power System | 3 |
| 1.12 | Uncertainties in a Power System | 4 |
| 1.13 | Load Modeling Issues | 4 |
| 1.14 | Situational Awareness | 5 |
| 1.2 | Threats to Power System Security | 5 |
| 1.21 | Overall Security Problem | 5 |
| 1.22 | Security Assessment Levels | 6 |
| 1.23 | Power System Stability | 7 |
| 1.3 | Emergency Control | 9 |
| 1.31 | Common Practice | 9 |
| 1.4 | Motivation and Objectives | 12 |
| 1.5 | Contributions of this Thesis | 12 |
| 1.6 | Information Technology (IT) Needs for the Power System Solution | 13 |
| 1.7 | CYMFLOW Software Package | 15 |
| 1.8 | Problem Statement | 18 |
| 1.81 | Problem Definition | 18 |
| 1.9 | Organization of the Thesis | 19 |
| Chapter – 2 | LITERATURE REVIEW | |
| 2.1 | Critical Failures | 20 |
| 2.2 | Database of Blackout | 20 |
| 2.3 | Special Protection Schemes | 22 |
| 2.4 | Island Schemes | 26 |

| | | |
|--------------------|--|----|
| Chapter – 3 | CRITICAL FAILURES IN POWER SYSTEMS | |
| 3.1 | Power System Issues Related to Critical Failures | 29 |
| 3.11 | Synchronous Generator Concept | 29 |
| 3.12 | Power System Instability | 30 |
| 3.13 | Angle Instability | 30 |
| 3.14 | Small Signal Angle Instability | 31 |
| 3.15 | Voltage Instability | 31 |
| 3.16 | Frequency Instability | 34 |
| 3.17 | Transient Angle Instability | 35 |
| 3.2 | Critical Failures – Blackouts | 36 |
| 3.21 | Blackout Occurrences | 37 |
| 3.3 | Modeling Blackouts | 40 |
| 3.31 | Mechanism of Blackouts | 41 |
| 3.32 | Industry Practice | 42 |
| 3.33 | Properties of Cascading | 44 |
| 3.34 | Some Models of Blackouts | 45 |
| 3.35 | Computational Study of Blackout Model | 46 |
| 3.36 | Computation and Results | 47 |
| Chapter – 4 | DESIGN AND IMPLEMENTATION OF SPS | |
| 4.1 | Introduction | 51 |
| 4.2 | Motivation | 52 |
| 4.21 | Some Occurrences of Major Failures | 53 |
| 4.3 | Traditional Protection and Special Protection Schemes | 53 |
| 4.31 | SPS Versus Conventional Protection | 54 |
| 4.4 | Concept of SPS | 56 |
| 4.5 | SPS Design Criteria | 56 |
| 4.6 | Algorithm for Determination of the Critical Lines | 68 |
| 4.7 | Load Flow Diagram for Determination of Critical Lines and Arming Limits | 69 |
| 4.8 | Simulation and Results | 71 |
| 4.9 | Economic Analysis | 86 |

| | | |
|--------------------|---|-----|
| Chapter -5 | DESIGN OF PROPOSED ISLAND SCHEME | |
| 5.1 | Introduction | 87 |
| 5.2 | Problem Definition | 89 |
| 5.3 | Methodology | 90 |
| 5.4 | Power System Modeling | 90 |
| 5.5 | Criteria to Determine the Cutset Elements | 94 |
| 5.6 | Island Detection Methodology | 95 |
| 5.7 | Simulation and Results | 96 |
| Chapter – 6 | CONCLUSIONS | |
| 6.1 | Design of SPS | 118 |
| 6.2 | Design of Island Schemes | 120 |
| 6.3 | Future Scope | 122 |
