CONTENTS

CHAPTER - I : INTRODUCTION  

CHAPTER - II : REVIEW OF THE LITERATURE

1. General review
2. Changes in the pigmentation
3. Carbohydrate metabolism
4. Nitrogen metabolism
5. Biochemical changes
6. Enzymatic changes
7. Role of plant hormones and substances other than plant hormones
8. Scope of the investigation

CHAPTER - III : MATERIALS AND METHODS

1. Plant Materials
1.1 Plant materials for Study of petal development
1.2 Study of Senescing petals of flower attached to the plants
1.3 Determination of effective concentrations of solutions of Kinetin, Sodium benzoate, Sucrose and abscisic acid
1.4 Study of Senescing petals of detached flowers
2. Fresh weight and dry weight measurements
3. Biochemical analyses
3.1 Extraction and estimation of chlorophyll
3.2 Extraction and estimation of anthocyanin
3.3 Extraction and estimation of carotenoids
3.4 Extraction and estimation of starch
3.5 Extraction and estimation of total sugar
3.6 Extraction and estimation of reducing sugar
3.7 Extraction and estimation of protein
3.8 Extraction and estimation of α-amino nitrogen
3.9 Extraction and estimation of total phenolics
4. Enzymatic analyses

4.1 Extraction and assay of catalase
4.2 Extraction and assay of peroxidase
4.3 Extraction and assay of ATPase
4.4 Enzyme extraction and assay of acid phosphatase
4.5 Extraction and assay of inorganic pyrophosphatase

5. Presentation of data

CHAPTER - IV : EXPERIMENTAL RESULTS

1. Studies on petal development and senescence of attached flowers
   1.1 Fresh weight and dry weight
   1.2 Biochemical changes
     1.2.1 Pigmentations
     1.2.2 Carbohydrate fractions
     1.2.3 Protein
     1.2.4 \( \alpha \)-amino nitrogen
     1.2.5 Total phenolics
     1.3 Enzymatic changes
       1.3.1 Catalase
       1.3.2 Peroxidase
       1.3.3 ATPase
       1.3.4 Acid phosphatase
       1.3.5 Inorganic pyrophosphatase

2. Studies on petal senescence of cut flowers
   2.1 Effect of abscisic acid on petal senescence of cut Dianthus flowers
   2.2 Effect of sucrose and sodium benzoate on petal senescence of cut Ervatamia flowers

CHAPTER - V : DISCUSSION
