List of Tables

Table 3.1. Details of 25 Microsatellite markers used in present study
Table 3.2. Sequences of adapters and primers used in AFLP analysis
Table 4.1. Number of alleles and allelic size range in RJF and different chicken breeds at different microsatellite loci
Table 4.2. Expected heterozygocity (He), observed heterozygocity (Ho) and polymorphic information content (PIC) measured in RJF and different chicken breeds at different microsatellite loci
Table 4.3. Frequency of different alleles for microsatellite locus ADL034 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.4. Frequency of different alleles for microsatellite locus ADL120 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.5. Frequency of different alleles for microsatellite locus ADL158 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.6. Frequency of different alleles for microsatellite locus ADL209 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.7. Frequency of different alleles for microsatellite locus ADL254 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.8. Frequency of different alleles for microsatellite locus ADL265 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.9. Frequency of different alleles for microsatellite locus ADL270 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.10. Frequency of different alleles for microsatellite locus ADL327 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.11. Frequency of different alleles for microsatellite locus ADL331 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.12. Frequency of different alleles for microsatellite locus LEI194 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.13. Frequency of different alleles for microsatellite locus LEI209 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.14. Frequency of different alleles for microsatellite locus LEI229 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.15. Frequency of different alleles for microsatellite locus LEI212 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.16. Frequency of different alleles for microsatellite locus LEI214 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.17. Frequency of different alleles for microsatellite locus LEI228 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)
Table 4.18. Frequency of different alleles for microsatellite locus LEI217 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.19. Frequency of different alleles for microsatellite locus MCW111 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.20. Frequency of different alleles for microsatellite locus LEI248 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.21. Frequency of different alleles for microsatellite locus LEI221 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.22. Frequency of different alleles for microsatellite locus LEI246 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.23. Frequency of different alleles for microsatellite locus LEI232 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.24. Frequency of different alleles for microsatellite locus LEI234 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.25. Frequency of different alleles for microsatellite locus LEI192 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.26. Frequency of different alleles for microsatellite locus LEI237 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.27. Frequency of different alleles for microsatellite locus LEI243 in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC)

Table 4.28. Population-specific alleles in RJF, White Leghorn (WLH), Aseel (AS) and Red Cornish (RC) at various microsatellite loci

Table 4.29. F-Statistics and gene flow estimated using microsatellite markers at each locus across the populations

Table 4.30. F-Statistics and Gene flow between populations based on all microsatellite markers

Table 4.31. Genetic distance measures based on shared allele frequencies using Microsatellite markers between the populations

Table 4.32. Genetic Polymorphism parameters (size range, total number of bands N, polymorphic bands, % polymorphism) within Red jungle Fowl (RJF), White Leghorn (WL), Aseel (AS) and Red Cornish (RC) populations with 20 AFLP primer combinations

Table 4.33. Nei's (1973) gene diversity (h) and Shannon's Information index (I) values at each locus for all 20 EcoR1/Taq1 primer combinations in different populations as well as across all the populations

Table 4.34. The scorable size range, Number of AFLP bands (N), Nei's (1973) gene diversity (h) and Shannon's Information index (I) values in different populations and across the populations with various primers combinations

Table 4.35. Population-specific AFLP markers in Red jungle Fowl (RJF), White Leghorn (WLH), Aseel (AS) and Red Cornish (RC) with various AFLP primer combinations
Table 4.36. Coefficient of genetic differentiation ($G_{ST}$) (above diagonal) and Gene flow ($Nm$) (below diagonal) estimated among populations using AFLP markers

Table 4.37. Genetic diversity statistics of all populations with AFLP markers

Table 4.38. Genetic identity estimated as Nei (1972) (above diagonal) and genetic distance (below diagonal) among populations using AFLP markers
