List of Figures

1.1 D-branes where open string can end. ......................................................... 4
1.2 Two parallel D-branes. ................................................................................. 15

4.1 The vertex operators are inserted at $x_1, x_2, x_3, x_4$ on the disk and we are fixing SL(2,R) by inserting three of them at 0, 1, $\infty$. The position of the vertex operator increases along the direction of arrow. ................ 58
4.2 Feynman diagrams for the noncommutative gauge theory for contact, $s,t$ and $u$ channels. ................................................................. 70
