ACKNOWLEDGEMENTS

I am deeply indebted to Dr. B.N. Pande, Reader in Environmental Science, Department of Botany, Marathwada University, Aurangabad, under whose guidance and encouragement I had the opportunity to work. Inspite of his various engagements he evinced great interest in my work, and I shall remain ever grateful for his inspiring guidance, valuable advice and it is because of his unfailing efforts that this work has been brought to completion.

I am deeply thankful to Associate Dean, Engineering and Agronomy Department of Agricultural College, Dhule, Farm Superintendent Prof. Bonde, Prof. V.C. Patil, Field Supervisor Shri Choudhary and his colleagues for making every facility available to me in the Campus of Agricultural College, Dhule during the period of my research work.

I shall ever remain grateful to all the members of the management of S.S.V.P. Sanstha's Late Karmaveer Dr. P.R. Chagrey, Science College, Dhule and to the Principal Shri B.M. Patil for granting me the permission to utilize the laboratory facilities.
I would like to express my sincere appreciation to Prof. V.C. Vaghmare, ex-Head of the Department of Botany for his co-operation.

I owe my special thanks to Dr. A.D. Kavishwar and Dr. M.T. Bhadane and other colleagues for their continuous help and encouragement throughout the research work.

I am also thankful to my wife Mrs. Lalita, sons Rajiv and Nitin and daughter Preeti for their patience and help by allowing me to isolate myself for some time and to demand attention at others during the research work. Without their understanding and support this work would not have been completed.

I will be failing in my duty if I do not mention the name of Mr. Nandkishore Jayswal, and Sow. Shakuntala Jayswal, my close relative for their hospitality and kind co-operation.

I would like to thank Shri B.S. Dhokane for photography, and Shri M.S. Muralidharan for dextrous, neat and clean typing of this thesis. I thank Prof. A.S. Patil (Ketan Computers) for his computeronics help.

B.G. Jayswal
