

# CONTENTS

Chapter	Contents	Page No.
<b>1.0</b>	<b>General Introduction and Literature review</b>	1
1.1	Mango processing	2
1.2	Mango as a fruit with high functional potential	2
1.3	Bioactive compounds in mango fruit	5
1.4	Total antioxidant capacity of mango fruit	9
1.5	Fruit wastage and value destruction	10
1.6	Wine	11
1.7	Non-grape fruit wine	14
1.8	Factors affecting quality of fruit wines	15
1.9	Mango wine – an alternative process to avoid fruit wastage	19
1.10	Food irradiation	23
<b>2.0</b>	<b>Effect of <math>\gamma</math>-irradiation on physico-chemical and microbiological properties of mango juice and wine</b>	
2.1	Introduction	32
2.2	Review of Literature	40
2.3	Materials and Methods	42
2.4	Results and Discussion	48
2.5	Conclusions	87
<b>3.0</b>	<b>Impact of <math>\gamma</math>-irradiation on total polyphenols, total flavanoids and antioxidant potential of mango juice and wine</b>	
3.1	Introduction	88
3.2	Review of Literature	91
3.3	Materials and Methods	98
3.4	Results and Discussion	106
3.5	Conclusions	137

<b>4.0</b>	<b>Effect of <math>\gamma</math>-irradiation on volatile composition and organoleptic properties of mango juice and wine</b>	
4.1	Introduction	138
4.2	Review of Literature	149
4.3	Materials and Methods	163
4.4	Results and Discussion	165
4.5	Conclusions	190
<b>5.0 <i>In vivo</i> antioxidant potential of mango juice and wine</b>		
5.1	Introduction	191
5.2	Review of Literature	218
5.3	Materials and Methods	222
5.4	Results and Discussion	238
5.5	Conclusions	275
<b>6.0</b>	<b>Summary and Conclusions</b>	276
<b>7.0</b>	<b>References</b>	285
	<b>List of publications</b>	351
