Acknowledgments	iv
List of Publications/Preprints	vi
1 General Introduction	1
2 Phase Transition	10
2.1 Introduction	10
2.2 SSB and Phase Transition	12
2.2.1 An Example : Chiral Symmetry Breaking	15
2.2.2 A Special Example : $U(1)_{PQ}$ Symmetry Breaking	18
2.3 Formation of Topological Defects	19
2.3.1 Cosmic String	21
2.3.2 Axionic String	23
2.3.3 Texture/Skyrmion	26
3 Quark-Hadron Phase Transition	29
3.1 Introduction	29
3.2 Quark-Hadron Phase Transition in the Early Universe	31

3.3	Cosmological Consequences of Quark-Hadron Transition . . .	34
3.4	Quark-Hadron Transition in the Presence of Density Fluctuations	36
3.4.1	Density Fluctuations Produced by Cosmic String Wakes	37
3.4.2	Dynamics of QCD Phase Transition in the Presence of Cosmic String Induced Density Fluctuations.	43
4	Generation of Baryon Inhomogeneity by Cosmic String Wakes	47
4.1	Introduction	47
4.2	Density Fluctuations Produced by "Wiggly" Cosmic Strings	48
4.3	Density Profile of Baryon Inhomogeneities	51
4.4	Effect on Nucleosynthesis	65
4.5	Conclusion and Discussion	70
5	Isocurvature Fluctuations by Cosmic String Wakes.	72
5.1	Introduction	72
5.2	Trapping of Axions and Baryons by Cosmic String Wakes . .	73
5.3	Profile of the Axionic Isocurvature Fluctuations	79
5.4	Conclusion and Discussion	84
6	Skyrmion Formation in 1+1 Dimensions with Chemical Potential	86
6.1	Introduction	86
6.2	An Analogy : Superconductor in an External Field	88
6.3	Skyrmion Formation in 1+1 Dimensions with Chemical Potential	92
6.3.1	Skyrmion Formation : Two Domain Case	98
6.3.2	Skyrmion Formation : Three Domain Case	104
6.4	Conclusions and Discussions	107
7	Summary	111
