

ACKNOWLEDGEMENT

I gratefully acknowledge and express my sincere regards to my supervisor Dr. Naresh Chandra Mishra for initiating me to the field of high Tc superconductivity. Throughout my learning and research he has been a constant source of inspiration. I learnt a lot from him and consider myself to be fortunate enough for having the opportunity of working under his guidance. He has not only guided me in this work but also has been a true friend and philosopher. I have no words to express my gratitude for him.

I extend my sincere gratitude to Prof. K. Patnaik, former Head of this Department for taking personal interest in my work which has gone a long way in completing this thesis. His words of encouragement have been invaluable at times of my difficulties.

I am thankful to Prof. B.B. Deo, former Head of this Department and all other faculty members of this department for their help and cooperation.

I express my thanks to Mr. H.P. Mohapatra, Dr. Simadri Misra, Mr. B.N. Dash for valuable suggestion and effective collaboration in this work. I am also thankful to Dr. D. Kanjilal and Prof. G.K. Mehta, Nuclear Science Centre, New Delhi for their interest and collaboration in my work.

I am thankful to Dr. Tanuja Mohanty, Ms Chandana Rath, Mr. Pramod Samal for their cooperation, encouragement and suggestion at various stages of my work

I express my gratitude to my parents for their blessings, inspiration and moral support. I value very much the cooperation and encouragement of my wife and for her sacrifice for completing this work.

Thanks are due to my colleagues of the Department and I acknowledge their help.
