

CONTENTS

CHAPTER-I	INTRODUCTION.....	1-33
I.1.	Superconductivity.....	1
I.2.	High Tc Cuprate Superconductors.....	7
I.2.1.	<i>Engineering cuprates for applications.....</i>	<i>7</i>
I.2.2.	<i>Complex crystal chemistry of the cuprates.....</i>	<i>8</i>
I.2.3.	<i>The general phase diagram.....</i>	<i>14</i>
I.2.4.	<i>The superconducting state.....</i>	<i>16</i>
I.2.5.	<i>Pairing mechanism.....</i>	<i>17</i>
I.2.6.	<i>Order parameter symmetry.....</i>	<i>17</i>
I.2.7.	<i>The normal state above Tc.....</i>	<i>18</i>
I.2.8.	<i>Homogeneous charge distribution.....</i>	<i>19</i>
I.3.	Defects and Superconductivity in the Cuprates.....	20
I.3.1.	<i>Atomic size point defects.....</i>	<i>21</i>
I.3.2.	<i>Stacking defects.....</i>	<i>24</i>
I.3.3.	<i>Screw dislocations.....</i>	<i>25</i>
I.3.4.	<i>Grain boundaries.....</i>	<i>25</i>
1.4.	Defect Controlled Charge Transport in Cuprate Superconductors.....	26
	References.....	30
CHAPTER-II	REVIEW OF LITERATURE.....	34-62
II.1.	Introduction.....	34
II.2.	Crystal Chemistry of the Cuprates and Intragranular Defects.....	35

II.2.1.	<i>Vacancy and interstitial defects in Y-Ba-Cu-O superconductors.....</i>	36
II.2.2.	<i>Substitutional defects.....</i>	39
II.2.2.1.	<i>Substitution at CuO₂ plane.....</i>	40
II.2.2.2.	<i>Substitution at CuO chain.....</i>	42
II.3.	Y123/Ag Composite System.....	44
II.3.1.	<i>Ag induced modification of mechanical and electrical properties of YBCO/Ag composites.....</i>	45
II.3.2.	<i>Pecolative current conduction in YBCO/Ag composites.....</i>	46
II.3.3.	<i>Grain growth in YBCO/Ag composites.....</i>	48
II.4.	Ion Irradiation Studies.....	49
II.4.1.	<i>Cuprates - a special class of materials for SHI irradiation.....</i>	50
II.4.2.	<i>Irradiation induced resistance variation in cuprates.....</i>	51
II.4.3.	<i>Irradiation induced structural modifications.....</i>	53
II.4.4.	<i>Irradiation induced enhancement of critical current in cuprates.....</i>	53
II.4.5.	<i>Irradiation induced effect on the superconductivity of the cuprate.....</i>	54
	References.....	55

CHAPTER-III	EXPERIMENTAL.....	63-101
III.1.	Introduction.....	63
III.2.	Sample Preparation.....	63
III.2.1.	<i>General consideration for preparation of oxide superconductors.....</i>	64

III.2.2.	<i>Preparation of bulk superconductors used in the present study.....</i>	67
III.2.3.	<i>Preparation of thick film superconductors used in the present study.....</i>	70
III.3	Characterization of the Samples.....	76
III.3.1	<i>AC magnetic susceptibility measurement.....</i>	77
III.3.2.	<i>DC resistivity measurement.....</i>	83
III.3.3.	<i>Critical current density (J_c) measurement.....</i>	88
III.3.4.	<i>Oxygen content determination.....</i>	89
III.4.	Swift Heavy Ion (SHI) Irradiation Experiment.....	92
	References.....	100

CHAPTER-IV

CRYSTALLOCHEMICAL ANALYSIS OF CHARGE AND SPIN FLUCTUATION IN OXYGEN DEFICIENT AND DOPED

	YBa₂Cu₃O_{7-y}.....	102-123
IV.1.	Introduction.....	102
IV.2.	Charge and Spin Degrees of Freedom in Oxygen Deficient YBCO.....	102
IV.2.1.	<i>Oxygen coordination and charge states of Cu.....</i>	102
IV.2.2.	<i>Charge Fluctuation.....</i>	103
IV.2.3.	<i>Spin fluctuations.....</i>	106
IV.2.4.	<i>Spatial equilibration.....</i>	108
IV.2.5	<i>Structural phase transition.....</i>	113

IV.3.	Charge Fluctuation Mechanism in Trivalent Metal Ion Substituted YBCO.....	115
IV.4.	Charge Fluctuation Mechanism in Monovalent Ion Substituted YBCO.....	118
IV.5.	Conclusion.....	119
	References.....	120

CHAPTER-V

	EFFECT OF Ag DOPING ON THE STRUCTURE AND SUPERCONDUCTIVITY OF $\text{YBa}_2\text{Cu}_3\text{O}_{7-y}$	124-144
V. 1.	Introduction.....	124
V.2.	Experimental.....	124
V. 3.	Results and Discussion.....	125
V.3.1.	<i>Disposition of Ag in the grains and grain boundaries of YBCO.....</i>	125
V.3.2.	<i>Possibilities of Ag occupying specific crystallographic sites.....</i>	129
V.3.3.	<i>Effect of Ag doping on lattice parameters.....</i>	129
V.3.4.	<i>Crystallochemical analysis of Tc variation with Ag content.....</i>	131
V.3.5.	<i>Silver substitution effect on the growth of oxygen order and diffusion in quenched YBCO system.....</i>	136
V.4.	Conclusion.....	143
	References.....	143

CHAPTER-VI

DC ELECTRICAL RESISTIVITY STUDY OF GRANULARITY IN BULK

YBa₂Cu₃O₇/Ag COMPOSITES.....145-168

VI.1 Introduction.....145

VI.2. Experimental.....145

VI.3. Results and Discussion.....146

VI.3.1. *Ag induced modification of electrical transport in YBCO/Ag composites.....146*

VI.3.2. *Current conduction below and above Ag percolation threshold.....153*

VI.3.3. *Percolative current conduction model for estimation of granularity parameters in YBCO/Ag composites.....157*

VI.3.4. *Evolution of Granularity Parameters with Ag Concentration.....160*

VI.3.5. *Improved grain growth behaviour.....164*

VI.4. Conclusion.....166

References.....167

CHAPTER-VII

PERCOLATIVE CURRENT CONDUCTION IN YBa₂Cu₃O₇/Ag THICK FILMS WITH VARYING

Ag CONCENTRATION.....169-208

VII.1. Introduction.....169

VII.2. Experimental.....169

VII.3. Results and Discussion.....170

VII.3.1. *Phase Formation.....170*

VII.3.2.	<i>Microstructure dependent resistivity variation with temperature.....</i>	172
VII.3.3.	<i>Dimensionality of current percolation in the composite thick films.....</i>	177
VII.3.4.	<i>Excess conductivity.....</i>	179
VII.3.5.	<i>The approach to zero-resistance state.....</i>	181
VII.3.6.	<i>Current controlled tailing of the resistivity transition near T_c - a test of heterogeneity of the sintered cuprates.....</i>	188
VII.3.7.	<i>Current voltage characteristics and paracoherent regime.....</i>	192
VII.3.8.	<i>Estimation of granularity parameters.....</i>	197
VII.3.9.	<i>Evolution grain alignment with Ag concentration.....</i>	197
VII.3.10.	<i>Suppression of voids and microcracks with increasing Ag content.....</i>	199
VII.3.11.	<i>Evolution of intergranular resistivity with Ag content and reduced percolation threshold through Ag channels.....</i>	200
VII.3.12.	<i>Non-reactivity of Ag with YBCO.....</i>	202
VII.3.13.	<i>Improved grain growth behaviour.....</i>	202
VII.4.	<i>Conclusion.....</i>	204
	<i>References.....</i>	205

CHAPTER-VIII ION IRRADIATION INDUCED INTER- AND INTRA-GRANULAR MODIFICATIONS

IN $\text{YBa}_2\text{Cu}_3\text{O}_7$ AND $\text{YBa}_2\text{Cu}_3\text{O}_7/\text{Ag}$ COMPOSITE THICK FILMS.....209-234

VIII.1 Introduction.....209

VIII.2 Experimental.....209

VIII.3 Results and Discussion.....210

VIII.3.1 120 MeV S ion irradiation effect.....212

VIII.3.1.1. Irradiation destroys coupling across grain boundaries.....217

VIII.3.1.2. Irradiation induced grain alignment.....218

VIII.3.2 250 MeV Ag ion irradiation effect.....219

VIII.3.2.1. Tc variation with irradiation fluence.....220

VIII.3.2.2. Ion-matter interaction.....224

VIII.3.2.3. SHI irradiation induced secondary electron emission.....225

VIII.3.2.4. Defect creation due to secondary electron irradiation.....226

VIII.3.2.5. Tc suppression due to electron irradiation induced point defects.....227

VIII.4. Conclusion.....229

References.....231

CHAPTER-IX CONCLUSION..... 235-242

IX.1. Problem Addressed.....235

IX.2. Techniques Used and Facilities Developed.....238

IX.3. Important Findings.....239

References.....242

APPENDIX - A	PROGRAM FOR AC MAGNETIC SUSCEPTIBILITY DATA ACQUISITION.....	243-245
APPENDIX - B	PROGRAM FOR DC FOUR PROBE RESISTIVITY DATA ACQUISITION.....	246-247
APPENDIX - C	PROGRAM FOR ACQUIRING CURRENT- VOLTAGE	248-250
