Acknowledgment

First and foremost I would like to thank the Almighty Allah whose blessings and grace have made this work a reality. For this and every thing else, I shall at the very outset thank Him from the deepest core of my heart.

I deem it a great pleasure to express my sincere and deep since of gratitude to my affectionate, revered and gifted teacher and research guide, Dr. A. K. Khan, Reader, Department of Zoology, Dr. Babasaheb Ambedkar Marathwada University, Aurangabad, for his noble guidance and keen interest towards my research work. I find my self short of words to express the indebted feelings about my guide.

I would like to extend my thanks to the staff members of the Department of Zoology Dr. Babasaheb Ambedkar Marathwada University, especially the Head of the Department.

Words are inadequate when one wants to voice one’s heart felt concerns they fall short in expressing the infinite compulsion of that head and the heart. This is more than true as I lift my pen to thank Prof. Dr. Ashok Kumar, Department of Zoology, University of Rajasthan, who has given me constant and undivided attention, sustained support and provided me the necessary facilities to carry out the experimental work of the present study. I would ever remain grateful to him for all that he has done to me.

I would be failing in my duty if I did not acknowledge the many facilities accorded to me by the National Medical Library, Delhi and the S.M.S. Medical College Library, Jaipur. The various resources provided by them aided & enriched my knowledge and critical acumen.
I express my sincere thanks to Prof. Dr. A. R. Rao, Dr. S. Banerjee and other lab colleagues at cancer biology laboratory, School of life sciences, Jawaharlal Nehru University, New Delhi, for their help and providing necessary facilities to carry out the biochemical estimations of the present study.

I am really fortunate to be associated, in India, with friends, colleagues and well-wishers who really helped me in many ways than I can adequately express specially Dr. Ritu prashar, Miss. Neelima Singh, Mr. Tej Kumar Pareek and Mr. Ravindra Samarth, Miss. Dr. Nayab Ansari, Mr. Shaikh Ayub, Mr. Haitham Abu-Alkas, Mr. Fadel Eidda, Mr. Ayman Barakat and Mr. Mohanad Sabha. I am very grateful to them.

I am also grateful to my American friend Miss. Chrissy Pescod for her encouragement and keeping my spirits up.

I am totally at a loss of how to express my feelings for my parents, sisters and brothers and brother-in-law who indulged every whim and fancy of mine and unstintingly lent their utmost both materially and spiritually. It was their love the saw me through times of despair & gloom; it was their trust who gave me the needed thrust to come up to their expectation and fulfill their long awaited goal. Their inspiring presence, despite thousands of miles apart, is always felt by me in the pulsation of my heart and the warmth of my breath. To them I owe the deepest regard and unforgettable gratitude along with extreme respect and veneration.

Finally I extend my thanks to Mr. R. N. Harkani for the photographic work and Ashok Computer for typing this thesis in record time.
