ACKNOWLEDGEMENTS

First, I would like to express my sincere thanks to my research supervisor, Prof. O. Mahammad Hussain, whose esteemed supervision, continuous support, inspiration, constant encouragement, constructive criticism, timely and cheerful cooperation, towards my research work. Really, it is great privilege for me to work under his able and pleasant guidance.

I would like to thank Dr. T. N. V. K. V. Prasad, Senior Scientist, Nanotechnology laboratory, Institute of Frontier Science and Technology, Regional agricultural research station, Acharya N. G. Ranga Agricultural University, Tirupati and authorities of the university, for giving me the opportunity and supportive ideas, for the completion of the research work.

I would like to thank Dr. P. Panneer Selvam, Senior Scientist, Department of Soil Science and Agricultural Chemistry, Indian Institute of Horticultural Research (IIHR-ICAR), Bangalore and the authorities of Indian Institute of Horticultural Research, for giving me the opportunity and valuable suggestions in completing the experimental work.

I would like to take the opportunity to thank my lab mates B. Purusotham Reddy, K. Sivajee Ganesh, A. Lakshmi Narayana, N. Guru Prakash, M. Dhananjaya and other part-time research scholars, for their help, cooperation and encouragement in completing the research work.

I would like to thank Department of Science and Technology (DST), New Delhi for providing the financial assistance in the form of DST INSPIRE Fellowship, to carry out the research work.

Lastly, and most importantly, I wish to express my deep sense of indebtedness to my beloved son Chi. Y. Madhava Moukthik, my beloved husband Mr. Y. Krishna Chaitanya, and my beloved parents Sri. K. S. Ram and Smt. T. V. Naga Padmini, my grand-mother, T. V. Hari Priya, Sister Smt. K. Sri Shambhavi, my in-laws Mr. and Mrs. Y. Chandramouli and my family members, who have patiently bared my absence and rendered their help and constant encouragement during the period of my research work. Without their valuable help, I could not attain this stage.
I would like to thank all the teaching staff and the non-teaching staff members of physics department, who helped me in word and deed during the course of my research work.

Finally, my sincere thanks to the authorities of Sri Venkateswara University, Tirupati for providing the research facilities.

K. SRI SINDHURA.
List of Publications

2. Biogenic synthesis of zinc nanoparticles from Thevetia peruviana and influence on soil exo-enzyme activity and growth of peanut plants.

3. Green synthesis of zinc nanoparticles from Senna auriculata and influence on peanut pot-culture.
   ISSN (Online): 2348 – 3997.

4. Synthesis and characterization of phytogenic zinc nanoparticles and their antimicrobial activity.
   K. Sri Sindhura, T. N. V. K. V. Prasad, and O. M. Hussain

5. First report on synthesis and characterization of phytogenic zinc nanoparticles and their antimicrobial activity.
Conference Papers

1. First report on synthesis and characterization of phytogenic zinc nanoparticles and their antimicrobial activity.
   International Conference on Biomedical Engineering. (ICBME 2011).
   Manipal University, Manipal, India.

   International Conference on Advanced Nanomaterials and Nanotechnology (ICANN-2011).
   Indian Institute of Technology Guwahati (IITG), India.

   International Conference and Workshop on Nano structured Ceramics and other Nanomaterials. (ICWNCN-2012). University of New Delhi, India.

   International Conference on Advanced Nanomaterials & Emerging Engineering Technologies. (ICANMEET-2013). Satyabhama University, Chennai, India.

5. Phytogenic synthesis of zinc nanoparticles from leaves extracts and influence on soil exo-enzyme activity and growth of peanut plants.
   Institute of Frontier Science and Technology, Regional Agricultural Research Station, Acharya N.G. Ranga Agricultural University, Tirupati.
