LIST OF FIGURES

2.1 Cancer progression and metastasis
2.2 Tumor cells and their metastasis cascade
2.3 Anatomic distribution of ulcerative colitis
2.4 Ulcerative colitis and colorectal cancer progression
2.5 Flower of *R. apiculata* with short and stout inflorescence stalk
2.6 Location map of Pichavaram mangrove forest
2.7 Geographic range of *R.apiculata* species among South East Asia
3.1 GC/MS chromatogram of the *R. apiculata* methanolic extract using Thermo GC- Trace Ultra VER: 5.0
3.2 LC/MS chromatogram of the *R. apiculata* methanolic extract at 254 nm using Thermo / Finnigan Surveyor System
4.1 Effect of *R. apiculata* during carrageenan induced paw edema
4.2 Effect of *R. apiculata* during formalin induced paw edema
4.3 Effect of *R.apiculata* on serum prostaglandin E-2 during carrageenan induced inflammation
4.4 Effect of *R.apiculata* on serum prostaglandin E-2 during formalin induced inflammation
4.5 Effect of *R.apiculata* on serum COX-2 during carrageenan induced inflammation
4.6 Effect of *R.apiculata* on serum COX-2 level during formalin induced inflammation
4.7 Effect of *R.apiculata* on serum iNOS during carrageenan induced inflammation
4.8 Effect of *R. apiculata* on serum iNOS during formalin induced inflammation

5.1 Effect of *R. apiculata* on total WBC count

6.1 Effect of *R. apiculata* on the total WBC counts during tumor development

6.2 Effect of *R. apiculata* on the tumor volume during solid tumor development

6.3 Effect of *R. apiculata* on tumor histopathology

6.4 Effect of *R. apiculata* on the body weight during solid tumor development

7.1 Histopathology of lung metastasis

8.1 Effect of *R. apiculata* on total WBC count during CTX induced toxicity

9.1 Macroscopic assessment of colitis in colonic tissue of the experimental mice

9.2 Effect of *R. apiculata* on wet colon weight during ulcerative colitis

9.3 Effect of *R. apiculata* on ulcerative colitis colonic morphology

9.4 Effect of *R. apiculata* on SOD level during ulcerative colitis

9.5 Effect of *R. apiculata* on NO level during ulcerative colitis

9.6 Effect of *R. apiculata* on reduced GSH level during ulcerative colitis

9.7 Effect of *R. apiculata* on LPO level during ulcerative colitis

9.8 Effect of *R. apiculata* on MPO activities during ulcerative colitis

9.9 Effect of *R. apiculata* on TNF-α level during ulcerative colitis

9.10 Effect of *R. apiculata* on iNOS level during ulcerative colitis

9.11 Effect of *R. apiculata* on LDH activity during colitis

9.12 Effect of *R. apiculata* on COX-2 activities during ulcerative colitis

9.13 Histopathology analysis of colonic tissues from experimental animals

9.14 *R. apiculata* inhibiting ulcerative colitis by enhancing anti-oxidant level
