ACKNOWLEDGEMENT

I thank the Almighty for the successful completion of my thesis because God has been the source of inspiration from start to finish. Today, I again pray to the omnipotent God to give power to my pen so that I may be able to write a few words in praise of those persons, who have helped me in writing this manuscript from the very beginning right up to the end, though I can never repay the debt of their timely help in these words.

From the cone of my heart I feel grateful to my revered teacher and guide Dr. C. D. Gupta, M.S., D.O.M.S., Reader in Department of Ophthalmology, M.L.B. Medical College, Jhansi. In the Bundelkhand Region, the children mostly suffer from brain T.B. on account of which, they having lost their eye sight become deprived of the enjoyment of the beauty of nature and its valuable treasure. My guide advised me to work for this neglected and ignored problem, which in the real sense of the term was the service of humanity. At last I got success in my venture, due to the careful supervision and critical correction of my guide. In spite of his busiest personal and professional schedule, I got every possible guidance and co-operation from him. His guidance and encouragement enabled me to solve each problem, for which he deserves gratitude. It would not be an exaggeration to say that success in this gigantic task was not possible without his never failing help and unreserved.
For his parental affection and sincere love.

It was not possible for me to prepare and submit my thesis timely and successfully without the proper guidance of my capable and persiverant co-supervisor, Dr. R.S. Sethi, M.S., J.C.H., Lecturer in the Department of Paediatrics, M.L.B. Medical College, Jhansi. He guided me in fulfilling all my curiosity and solving all my problems by giving his most valuable time. For his kind guidance, I shall ever grateful to him. Once again I feel obliged to him for his constructive and beneficial schemes and affectionate inspiration and encouragement.

I offer my emotional and sentimental gratitude to Dr. A.N. Mehrotra, M.S., Professor and Head of the Department of Ophthalmology, M.L.B. Medical College, Jhansi for his timely guidance, sympathy and love which he showed from time to time in solving all my problems.

I feel obliged to Mr. B.D. Nathur, M.Sc., D.H.Sc., Lecturer in Statistics & Demography, Post Partum Department, M.L.B. Medical College, Jhansi for his successful guidance and assistance in the analysis of data.

I shall fail in my duty, if I do not grateful to Dr. B.S. Jain, M.S., Lecturer, Department of Ophthalmology, M.L.B. Medical College, Jhansi for his cooperation and sympathy. I cannot too adequately thank Dr. Vijay Misurya, M.S., D.O.M.S., Lecturer in the
Department of Ophthalmology, M.L.B. Medical College, Jhansi for his every possible help in the completion of this work.

I deeply value and admire the generous help extended to me by my colleagues, Dr. M.C. Agarwal (Senior Research fellow, I.C.R.I.), Dr. Veena Rastogi (Demonstrator in Paediatrics), Dr. S.K. Jain, Dr. P.K. Jain, Dr. J. Ahmad, Dr. H.C. Agarwal and Dr. P. Singh, from time to time.

I shall ever remain indebted to my parents whose spirit of self-neglect, austerity and persistent inspiration enabled me to get success in my undertaking. I also thank my relatives and well wishers whose blessings have led me to reach my goal.

I am undoubtedly thankful to Mr. B.P. Tiwari for his skilled, neat and faultless typing.

At last but not the least, I thank to the little innocent babies, children and parents, without whose co-operation this study could not be made a success. I shall remain thankful for ever.

Dated: 30.7.64
