

Acknowledgement

I wish to extend my profound sense of gratitude and indebtedness to my supervisor Dr. I. M. Beg, Reader and Head in the department of Chemistry, Dayanand Vedic Postgraduate College, Orai but for whose guidance and valuable suggestions, it would not have been possible for me to complete this work. His able guidance and affectionate cooperation and encouragement during the tenure of the reported investigations have made my path crystal clear to enable me to finish it in time. I feel greatly obliged to all other teachers of the Chemistry Department especially Dr A.K. Nigam, Dr J. P. Pachauria, Dr S.P. Srivastava, Dr G.S. Niranjana, Dr K. C. Gupta, Dr R. K. Nigam and Dr S. K. Gupta for extending all possible help whenever I needed their guidance for resolving my problems.

I will be failing in my duty if I do not put on record my gratitude to the Principal of Dayanand Vedic Postgraduate College, Orai for providing all the available library and laboratory facilities. I am at loss to express my gratitude to my parents and parents-in-law but for whose blessings, assistance, cooperation and encouragement; my research work would never have taken the present shape. I also express my sincere gratitude and indebtedness to my husband Shri Pradeep Kumar Tarsaulia without whose active cooperation and fortitude and endurance, I could never have carried through the work to its logical conclusion.

The contribution of my elder sister Ms Jyoti and brother-in law Dr Sanjay Gupta, Reader in Commerce in MLB College, Gwalior has been tremendous by way of encouragement and moral support in addition to assisting me in availing of the library facilities from Jiwaji University and Defence Research Laboratory in Gwalior. I am extremely grateful to both of them.

I am also beholden to Dr. S.C. Khurana, Reader in Chemistry Department who has taken very keen interest in compilation of this presentation in the present form. Last but not the least I am thankful to all my friends, library and laboratory personnel and all others who took enough pains to make my work possible.

Orai
