

ACKNOWLEDGEMENT

A profound feeling of gratitude and admiration overwhelms me as I express my thanks towards my guide Dr. (Ms.) Vrishali Deosthali who has always been available as a resource be it scholarly, socially, emotionally, or administratively. Her involvement in my career cannot be overstated. Thanks are also due to Dr. P.S. Roy, Deputy Director, National Remote Sensing Agency, Hyderabad for being my co-guide and giving me very valuable suggestions.

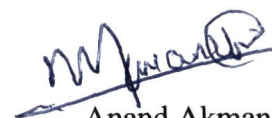

I gratefully acknowledge support from Dr. V. S. Ghole, Head, Department of Environment Sciences. My sincere thanks are due to Indian Council of Agricultural Research, National Agricultural Technology Project (NATP) for funding the research work and giving me an opportunity to work as a senior research fellow in Department of Geography.

This research took shape from numerous discussions with eminent scientists during a workshop in February 2003 and several interactions afterwards. Prof. B. L. Deekshatulu, Distinguished ISRO Professor, University of Hyderabad, Dr. S. M. Virmani, Ex-Principal Scientist, ICRISAT, Hyderabad, Dr. V. M. Raut, Head (Retd.), Agharkar Research Institute, Pune and Dr. M. C. Varshneya, Vice Chancellor, Anand University, Gujarat, provided critical suggestions and I am thankful to them.

It is with deep sense of gratitude I mention the help received from Mr. Khape, Taluka Agriculture officer (Retd), Shirol Taluka, Kolhapur District, Mr. Mali and Mr. Langare during the field experiments. Special thanks are also due to the farmers of Shirol *taluka* on whose fields we conducted the experiments.

I take this opportunity to express thanks to my colleagues especially Mr. Chandan Salunke, Dr. Sachin Deore and Dr. C. M. Nikam for rendering the valuable help during field work.

I am grateful to Mr. Anil Kale for helping me with rainfall data analysis and my friend Mr. Vinod Raskar, who gave me excellent literature on neural network modeling. Thanks are also due to Mr. Tarun Sharma and Mr. Saurabh Kapoor for being there, for long discussions and longer parties often late at nights during my stay at the University hostel.

Anand Akmanchi
