

List of Figures

Figure 1. 1 Soybean area and yield in India (1980-81 to 2005-06)	1
Figure 1. 2 Architecture of a typical DSS	4
Figure 1. 3 Experimental sites in study area	7
Figure 1. 4 a) Village map b) Soil depth map and c) Spatial unit map.....	8
Figure 1. 5 Conceptual framework of Soybean Spatial Decision Support System	11
Figure 2. 1 Schematic diagram of training ANN for phenology and yield models	30
Figure 2. 2 Scheme of the experiment	32
Figure 2. 3 Layout of the experiment (same applicable for medium and deep soils).....	32
Figure 2. 4 Architecture of neural network for phenology modeling	37
Figure 2. 5 Architecture of neural network for yield modeling.....	42
Figure 2. 6 Schematic diagram of crop management module in Soya-SDSS	45
Figure 2. 7 Vegetative and reproductive growth stages of soybean	48
Figure 2. 8 Observed and estimated Julian dates of growth stages	52
Figure 2. 9 Observed and estimated Julian days of growth stages	53
Figure 2. 10 a) Interpolated pH and b) Classified map of spatial units according to mean pH	57
Figure 2. 11 a) Interpolated Electric conductivity and b) Classified map of spatial units according to mean EC	58
Figure 2. 12 a) Interpolated Organic carbon and b) Classified map of spatial units according to mean OC	59
Figure 2. 13 a) Interpolated Phosphorous and b) Classified map of spatial units according to mean P.....	60
Figure 2. 14 a) Interpolated Potassium and b) Classified map of spatial units according to mean K.....	61
Figure 2. 15 Observed yield according to treatments (2003 and 2004).....	64
Figure 2. 16 Scatterplot of estimated vs. observed yield (kg/ha).....	67
Figure 2. 17 User interface of Soya-SDSS	71
Figure 2. 18 Crop management output report for the given input	71
Figure 3. 1 Schematic diagram of the soil water balance model	82
Figure 3. 2 Crop coefficient curve for soybean	86
Figure 3. 3 Schematic diagram of irrigation scheduling model.....	93
Figure 3. 4 Schematic diagram of water stress model	96
Figure 3. 5 Scheme of sensitivity analysis for irrigation scheduling model.....	99
Figure 3. 6 Scheme of sensitivity analysis for water stress model	100
Figure 3. 7 Embedding irrigation and water stress models in GIS	101
Figure 3. 8 a) Interpolated AWC (0-15cm) and b) Classified map of spatial units according to mean AWC.....	104
Figure 3. 9 a) Interpolated AWC (15-30cm) and b) Classified map of spatial units according to mean AWC	105
Figure 3. 10 a) Interpolated AWC (30-60cm) and b) Classified map of spatial units according to mean AWC	106

Figure 3. 11 a) Interpolated AWC (>60cm) and b) Classified map of spatial units according to mean AWC	107
Figure 3. 12 Total AWC (mm) according to soil depth.....	108
Figure 3. 13 Observed and estimated soil moisture.....	113
Figure 3. 14 Growth stage-wise observed and simulated soil moisture	114
Figure 3. 15 Soil depth-wise observed and simulated soil moisture.....	115
Figure 3. 16 Layer-wise observed and simulated soil moisture.....	116
Figure 3. 17 Sample water management report (unlimited water supply).....	122
Figure 3. 18 Sample graphical display (unlimited water supply)	122
Figure 3. 19 Sample water management report (limited water supply).....	124
Figure 3. 20 Sample graphical display (limited water supply)	124
Figure 4. 1 Scheme of land suitability analysis	135
Figure 4. 2 Hierarchical organization of the criteria.....	136
Figure 4. 3 Fuzzy membership functions of Semantic Import model.....	141
Figure 4. 4 Fuzzy membership functions for seven ordinal criteria	144
Figure 4. 5 Fuzzy membership functions for a)OC, b) pH and c) EC	145
Figure 4. 6 Embedding land management module in GIS.....	147
Figure 4. 7 Flowchart of soybean inventory using remote sensing	149
Figure 4. 8 Fuzzy criteria layers a) Soil texture and b) Coarse fragments.....	158
Figure 4. 9 Fuzzy criteria layers a) Drainage and b) Risk of flooding	159
Figure 4. 10 Fuzzy criteria layers a) Soil depth and b) Organic carbon	160
Figure 4. 11 Fuzzy criteria layers a) pH and b) Electric conductivity	161
Figure 4. 12 Fuzzy criteria layers a) Slope and b) Erosion hazard	162
Figure 4. 13 Land suitability map for soybean	163
Figure 4. 14 Distribution of land according to suitability in Shirol <i>taluka</i>	164
Figure 4. 15 Sample land management report	168
Figure 4. 16 Spectral characteristics of soybean and other land covers	171
Figure 4. 17 a) IRS 1D LISS3 FCC (3,2,1 bands) and b) Classified land use map (2003) .	172

List of tables

Table 2. 1 Field operations carried out during the experiment.....	33
Table 2. 2 Observed phenology and accumulated GDDs (2003 and 2004).....	51
Table 2. 3 Error statistics for phenology model estimates.....	53
Table 2. 4 Summary statistics for observed yield according to treatments	63
Table 2. 5 Observed and estimated yield (kg/ha)	66
Table 2. 6 Error statistics for yield estimates.....	67
Table 3. 1 Root coefficients (k) for soybean crop	87
Table 3. 2 Yield response factor (ky) for soybean crop.....	96
Table 3. 3 Observed and estimated soil moisture (mm)	111
Table 3. 4 Difference based error statistics.....	112
Table 3. 5 Correlation based error statistics.....	112
Table 3. 6 Results of the sensitivity analysis	119
Table 3. 7 List of variables available for graphical display.....	121
Table 4. 1 Pairwise Comparison Scale for criteria	135
Table 4. 2 Determining criterion weights (example).....	137
Table 4. 3 Pairwise comparison matrix and derived criterion weights.....	137
Table 4. 4 Ordinal numbers for seven criteria	143
Table 4. 5 Criteria and Rating of Land Qualities for Soybean (FAO).....	143
Table 4. 6 Fuzzy model parameters for seven ordinal criteria.....	144
Table 4. 7 Fuzzy model parameters for three cardinal criteria	144
Table 4. 8 Soybean and other landuse inventory (2003)	170
Table 4. 9 Assessment of classification accuracy	170
Table 4. 10 Soybean area (2003) according to suitability classes	171
