ACKNOWLEDGEMENTS

I would like to thank my supervisor Dr.J.B.Nadda for his continuous support in the Ph.d program. He was always there to listen and advise. He is responsible for involving me in the project in the first place. He taught me how to think and express my ideas. He showed me different ways to approach a research problem and the need to be persistent to accomplish my goal. Thanks are due to Dr.Vijay Kaushal and Dr Pawan Garga who always spared their valuable time to meet me and talk about my ideas, think through my problems and proof read my chapters. I am grateful to my teachers Dr.Suresh Kumar, Dr.Deepak Sood, Dr.Sadhna Mahajan, Dr.Yoginder Verma, Dr.Shashi Verma and Dr.C.L.Chandan who have been generous with their time, suggestions and contributions.

Besides my advisers I want to thank my colleagues Mrs.Sunita Kapta and Mr.Navneet Gupta for their encouragement and insightful comments. A special word of thanks is due to Mr.Bhajan Dass who spent innumerable hours to help me complete the writing of this thesis.
Thanks are due to Mrs. Uma and Meena who made themselves available at short notice to help with the editing of the final draft of the thesis.

Last, but certainly not the least, I thank my family for being there for me. My mother, Mrs Pushpa Joshi, for showing me the joy of intellectual pursuit. My sisters Ritu and Nidhi for their unconditional support and encouragement, for listening to my complaints and frustrations and for believing in me. My husband Dinesh for constantly reminding me that my research would be useful only if I completed it! My children Siddhant and Tarinee for sorting out computer related hitches and typing out pages to give me a reprieve.

My profound appreciation goes out to my colleagues and acquaintances who remain unnamed but have contributed immensely to my work; I would like them to know that their generosity has been my inspiration.
