List of Figures

Figure 1: Technology can help us implement lifetime learning for masses in addition to traditional classroom learning ................................................................. 25
Figure 2: Typical stages of current Indian education system ........................................ 26
Figure 3: Schematic highlighting how technology has impacted different fields in society a) Scenario where a Farmer is considering all the available factors to the best of his knowledge to plan, b) scenario where agriculture is considered similar to industry/engineering activity 28
Figure 4: An example of what a revolutionized education system might look like. .......... 31
Figure 5: Video streaming by Gyan Darshan .......................................................... 32
Figure 6: Behaviourism .......................................................................................... 41
Figure 7: Cognitivism ............................................................................................ 42
Figure 8: Typical approaches used for delivery of distance learning ............................ 45
Figure 9: Role of Computer in Modern Age Learning ................................................. 48
Figure 10: Typical classifications of e-Learning approaches ....................................... 51
Figure 11: Classification of E-Learning approaches based on method of delivery and instruction used ............................................................................. 51
Figure 12: Various modules for various tasks in an LMS ............................................ 54
Figure 13: Tasks in a CMS ......................................................................................... 55
Figure 14: Data mining as a confluence of various disciplines ...................................... 59
Figure 15: Various sub fields in education sector ....................................................... 60
Figure 16: Steps in data mining ................................................................................. 62
Figure 17: Two possible dimensions of Educational Data Mining research .................. 64
Figure 18: Diverse data sources for EDM ................................................................... 65
Figure 19: Team work in EDM .................................................................................. 66
Figure 20: The Hierarchical structure of educational data .......................................... 80
Figure 21: Plot of Power versus Sample Size, reproduced from [96].................................85
Figure 22: Data file in MS-Visual Studio’s Visual FoxPro displaying first column...........86
Figure 23: Data file in MS-Excel.................................................................................86
Figure 24: Pivot table used to count variables & detect blanks and wrong code ..........87
Figure 25: Steps in Data Cleaning ..............................................................................89
Figure 26: Using Pivot table-1....................................................................................90
Figure 27: Using Pivot table-2....................................................................................90
Figure 28: Using Pivot table feature to check uniqueness of values of primary key....91
Figure 29: Checking length of a field ..........................................................................91
Figure 30: Counting frequency ....................................................................................92
Figure 31: Accuracy of the data....................................................................................92
Figure 32: Error Correction ........................................................................................93
Figure 33: Validity check.............................................................................................93
Figure 34: Age graph. Last column represents wrong code .......................................94
Figure 35: Programs opted for by the students...............................................................95
Figure 36: Choice of medium (count pie chart).............................................................95
Figure 37: Pie chart showing gender distribution .........................................................96
Figure 38: Distribution of Pass out year of students.....................................................96
Figure 39: Employment status of students.....................................................................97
Figure 40: Graph showing area distribution for students.............................................97
Figure 41: Graph showing distribution of students who have an email ID or not........97
Figure 42: Type of disabilities in students enrolled in IGNOU ......................................98
Figure 43: Distribution of previous qualifications of enrolled students ......................98
Figure 44: Distribution showing percentage of students already registered with IGNOU.99
Figure 45: Plot showing division obtained by students in prior course enrolled.........100
Figure 46: Most disabled students are enrolled in BCA course of SOCIS, IGNOU .......... 104
Figure 47: A simple decision tree [100] ........................................................................ 106
Figure 48 Root Node of the ID3 decision tree .................................................................. 108
Figure 49: Decision Tree obtained using ID3 ................................................................. 110
Figure 50: Social learning (learning by observing role models) ...................................... 111
Figure 51: Graph showing distribution of month of birth for disabled students ............. 116
Figure 52: Gender distribution of disabled students showing that the majority of enrolled disabled students are male .............................................................................................. 117
Figure 53: Flags for speech impaired .................................................................................. 119
Figure 54: Read Out Loud options in Adobe Acrobat Reader ........................................ 121
Figure 55: Equation of Modality ....................................................................................... 121
Figure 56: Extra-large and dark mouse pointers (Mouse properties in Control Panel) ...... 126
Figure 57: User Interface Tree[133] .................................................................................. 128
Figure 58: Link removal tool [59] .................................................................................... 131
Figure 59: Stretch text tool [60] ....................................................................................... 131
Figure 60: Course monitor tool [61] ................................................................................ 132
Figure 61: Screen shot 1-An example of DialAT app function for smartphone .............. 133
Figure 62: Screen shot 2-representing lists of vendors with recognizable logos ............. 133
Figure 63: Screen shot 3-representing various categories of AT (under a Local Vendor) .... 134
Figure 64: Screen shot 4- showing various hardware and software tools ...................... 134
Figure 65: Screen shot 5-showing contact details of a vendor ........................................ 134
Figure 66: Team work in EDM ......................................................................................... 138
