ACKNOWLEDGEMENTS

The work presented in this thesis would not have been possible without my close association with many people. I take this opportunity to extend my sincere gratitude and appreciation to all those who made this Ph.D. thesis possible.

First and foremost, I would like to extend my gratitude to my research guide Dr. Joginder S. Dhiman for introducing me to this exciting field of Mathematics and for his dedicated help, advice, inspiration, encouragement and continuous support, throughout my Ph.D. His enthusiasm, integral view on research and his mission for providing high quality work, has made a deep impression on me. During our course of interaction during the last five years, I have learnt extensively from him including how to raise new possibilities, how to regard an old question from a new perspective, how to approach a problem by systematic thinking, etc. Every time, I meet him, I can feel “the fire in the belly” which he always talks about. I owe him lots of gratitude for having me shown this way of research. I am really glad to be associated with a person like him in my life.

My special words of thanks should also go to Dr. J.R. Gupta ((Retd. Professor and former Head of Mathematics, Department, H.P. University, Shimla) for his continuous support, guidance, cooperation, encouragement and valuable discussions. I owe a lot of gratitude to him.

I express my cordial thanks to Prof. R.G. Shandil, Prof. M.G. Gourla, Prof. H.S. Baniyal (Dean of Studies) and all other members(teaching and non teaching) of Department of Mathematics, for their cooperation and valuable suggestions.

I am also grateful to Prof. R.P. Sharma, Chairman, Department of Mathematics, H.P. University, Shimla for creating necessary facilities needed for the smooth completion of the work.

My special regards to my teachers because of whose teaching at different stages of studies has made it possible for me to see this day. Because of their kindness, I was able to reach a stage where I could write this thesis.
As always it is impossible to mention everybody who had an impact to this work, however there are those whose spiritual support is even more important. I feel a deep sense of gratitude for my parents, mother-in-law and father-in-law who formed part of my vision and taught me good things that really matter in life. Their infallible love and support has always been my strength. Their patience and sacrifice will remain my inspiration throughout my life. I am also very much grateful to all my family members (Ajay, Arshee, Abhay, Bharat, Abhimanyu, Shourya) and relatives (Sh.Prem Singh, Sh. Mehar Chand, Sh. Pyre Lal, Sh. Dharam Chand, Prakash, Kailesh, Devender, Vinod, Balram, ) for their constant inspiration, encouragement with love and affection.

I am unable to find adequate words to express my heartiest and sincerest gratitude to my brother (Er. Raj kumar) and Bhabhiji whose silent blessings and sacrifices have always inspired and motivated me.

I would like to express my sincere thanks to my beloved wife Kanta Thakur for the patience shown by her during the research work.

My special thanks are due to staff and members of Sai Engineering Foundation, New Shimla and to my friends Dr. Shashi Sood, Dr. R.K. Sood, Sanjay, Nirmal, Raj Kumar and many others who have directly or indirectly contributed in my research.

Finally, I gratefully acknowledge the Principal Govt. College Sanjauli, Shimla and Department of Education, Government of H.P. for granting me two years study leave for pursuing the research work.

Dated: 19-06-2012

(Vijay Kumar)
