ACKNOWLEDGEMENTS

It is my great privilege to express my most sincere gratitude to my esteemed teacher and guide honourable Prof. S. K. Gupta, Department of Mathematics, Himachal Pradesh University, Shimla -171 005, under whose supreme and enlightened guidance I have been able to accomplish this work. He proved to be a beacon guide to me but for whose constant encouragement and painstaking efforts the study could not have been accomplished. I gratefully acknowledge my sincere indebtedness to his illuminating guidance, whole-hearted co-operation right from beginning of this research to its write-up and completion. I will always remain grateful to him for giving direction to my life.

It gives me immense pleasure to place on record my deep sense of gratitude to Prof. J. R. Gupta, Chairman, Department of Mathematics, Himachal Pradesh University, Shimla, for his constant encouragement and generous help. I am grateful to him for providing me the facilities necessary for conducting this research work.

Special mention is merited to express my heartiest thanks to Prof. J. N. Sharma, Dr. R. P. Sharma, Dr. R. G. Shandil, Dr. Veena Sharma and other staff members of Department of Mathematics and library, Himachal Pradesh University, for their sound council, useful advice and keen professional involvement in this present work despite their onerous duties and busy schedule.

To my parents and In-laws, who have always been a constant source of inspiration and encouragement, I owe a profound sense of gratitude. My head bows in obeisance to them for enabling me to realise my most cherished dream.

The significant and undeniable contribution has been of my would be' Vikrant Mahajan, who all along stood by me and gave me the strength and courage required to complete the task.
Words fail to express adequately my feeling towards my dearest niece Sanch, Kushan, Aakshi and Sania, who, with his/her constant smile and cheering tales, never let me feel desperate during my research.

Profound thanks are due to Mr. Sanjeev Verma, research Scholar, Department of Physics, H. P. University, and Shimla - 5, for his generous help in programming for graphical work of my research.

My heartfelt thanks and appreciation are due to all my friends, who helped me in innumerable ways and to an extent quite beyond my power to specify and also special thanks to Sanjay (GAPPU PHOTOSTAT).

This work would be remains incomplete if God has not provided me enough patience and power during this period. I shall be highly grateful to God.

"Timeliness is of great importance in research. A development cannot be forced, but must await the accumulation of the necessary skills and understandings. The investigator, though he is conscious principally of the exertions he makes in paddling his own canoe, do never tides and currents of which he may not be aware carry along the less. He should therefore spend a little of his time in seeing how all the other canoes are getting along, for he may thereby detect a current of which he can take advantage."

I have tried to give due acknowledgements to all, but I apologize for any involuntary, omission.

(Miss. POOJA KUMARI)
