

# CONTENTS

DECLARATION	i
CERTIFICATE	ii
ACKNOWLEDGEMENTS	iii
ABSTRACT	vi
CONTENTS	ix
LIST OF TABLES	xiii
LIST OF FIGURES	xiv
CHAPTER 1	2
INTRODUCTION	2
1.1. Healthcare Systems	2
1.2. Impact of MRI in Diagnosis	4
1.3. Growth of MRI Usage	5
1.4. MRI Examinations on Organs In Percent	6
1.5. MRI Processing	8
1.6. Need for The Study	9
1.6.1. Correctness and Accuracy	11
1.6.2. Cost and Size	12
1.6.3. Limitations of Resources	12
1.7. Cloud Services to Enhance Healthcare System	13
1.8. Advantages of Cloud Medical Imaging	16
1.8.1. Connectivity from Anywhere at Anytime	17
1.8.2. System Elasticity	17
1.8.3. Data Protection and Redundancy	17
1.8.4. Payment Flexibility	18
1.9. Motivation	18
1.10. Organization of The Thesis	21
CHAPTER 2	23
LITERATURE REVIEW	23

2.1. Introduction	23
2.2. Literature of Brain Tumor and MRI	24
2.3. Segmentation of brain MR images	27
2.4. Brain MR image Segmentation Algorithms	30
2.4.1. Threshold-Based Procedures	32
2.4.2. Region Based Procedures	33
2.4.3. Clustering and Classification Methods for Segmentation	34
2.5 Genetic Algorithms	38
2.5.1 Genetic Algorithms for brain MRI Segmentation	41
2.5.2 Parallel Genetic Algorithm for Image Segmentation	44
2.6 Image Processing in Cloud Computing	52
2.6.1 Hadoop/ Spark applications for Cloud	53
CHAPTER 3	57
DATA COLLECTION AND METHODOLOGY	57
3.1. Introduction	57
3.2. Methodology	58
3.3. Protocols and Workflows for acquisition and processing	59
3.4. Evading the subjective in selecting the features	59
3.5. Data Integrity	60
3.6. Source of Brain MR images	61
3.6.1. Hardware Description	63
3.6.2. Subjects	63
3.6.3. Summary of Imaging Protocols	63
3.6.4. Description of Protocol:	63
CHAPTER 4	66
Analysis and Results	66
4.1. Introduction	66
4.2. Brain MRI Segmentation Using Proposed Migration Technique	67
4.2.1. Image Acquisition	67

4.2.2. Images Storage into HDFS:	68
4.2.3. Image Pre-Processing	69
4.2.4. Noise Removal (de-noising)	70
4.2.5. Skull Striping	72
4.2.6. Image Sharpening	75
4.3. Image Features	78
4.4 Parallel Genetic Algorithm for Image Segmentation	80
4.4.1 Topology Used	81
4.4.2 Proposed Average Migration Technique	82
4.4.3 Segmented Images Output	87
4.5 SVM for Image Classification	88
4.6. Proposed Architecture using Hadoop/Spark	93
4.6.1. Apache Hadoop2.4.0 in AWS Cloud	93
4.6.2. Spark1.4.0 in AWS cloud	95
4.7. Performance Evaluation	96
4.8. Analysis and Discussion	102
4.8.1. Increase in Brain MRI Segmentation Efficiency	102
4.8.2. Increase in Performance in Cloud Setup	104
CHAPTER 5	108
SUMMARY AND CONCLUSIONS	108
5.1. Summary	108
5.2. Contribution of this research	109
5.3. Future Work	112
BIBLIOGRAPHY	115
PUBLICATIONS AND PROCEEDINGS	133
