ACKNOWLEDGEMENT

The author wishes to express his deep sense of gratitude to Dr. T. Sundararajan, Professor of Civil Engineering, Pondicherry Engineering College, Pondicherry-14, for his motivation, invaluable suggestions and personal supervision of the work. The author sincerely appreciates his deep understanding, keen interest, untiring enthusiasm, and constant care he took in shaping this Thesis. The author also acknowledges his meticulous evaluation of the work at each stage and inimitable patience shown during the preparation of the manuscript, apart from, the cordial and affectionate treatment.

Suggestions and encouragement given by Dr. D. Govindarajulu, Professor and Dr. S. Sivamurthy Reddy, Assistant Professor, Department of Civil Engineering, Pondicherry Engineering College, Pondicherry, during the various stages of the Thesis, is thankfully acknowledged.

Dr. S. Kothandaraman, Professor, and Dr. V. L. Narasimha, Assistant Professor, Department of Civil Engineering, Pondicherry Engineering College, Pondicherry, have extended their timely support for utilizing the laboratory facilities and by providing valuable literature, which are acknowledged with gratitude.

Constant encouragement and suggestions given by all other Faculty members of the Dept. of Civil Engineering, is greatly appreciated. The author wishes to express his gratitude to the Principal, Pondicherry Engineering College, (PEC), Pondicherry, for having permitted to utilize the Library and other facilities available in the Institute.

The author appreciates the assistance rendered by the Laboratory Staff (Technical / Non-Technical) of the Department of Civil Engineering, PEC, Pondicherry, in fabrication and conducting the various experiments relating to this Thesis. The kind cooperation and help extended by some of the Faculty of Chemistry and Physics, PEC, Pondicherry, for carrying out some of the tests reported in this work, is gratefully acknowledged.

The author wishes to express his whole-hearted thanks to the Librarian, PEC, and his Staff members, for their help and support in collecting the literature relevant to the present
study. Sincere thanks to the authorities of NLC, Neyveli, for the supply of flyash used in the present investigation. Scientists of the Concrete Composite Lab, and Library Staff, SERC, Chennai, are also thanked for their kind suggestions, and for extending the Library the facilities extended to collect valuable literature.

The author express his indebtedness and sincere thanks to Dr. S.Krishnamoorthy, Professor of Civil Engineering Department, (Retd.), IIT, New Delhi, for his motivation and valuable suggestions at the early stages of initiation of research work in this area, which finally helped in the completion of a portion of work reported in this Thesis.

The author acknowledges with a sense of deep gratitude the kind support extended by the following individuals, who have graciously spared valuable literature relevant to the present work. Dr. R.N. Swamy, Professor, University of Sheffield, Sheffield, U.K; Dr. K. Ghavami, Professor, Dept. Of Civil Engg., PUC, Rio de Janeiro, Brazil; Dr. Romildo D. Toledo Filho, Professor, Federal University of Rio de Janeiro, Rio de Janeiro, Brazil; Dr. Holmer Savastanov Jr., Professor, University of Sao Paulo, Brazil; Prof. (Dr.) Kurharska, Wroclaw Technical University, Poland; (Ms) Dr. C. F. Ferraris, Building & Fire Research Lab., Natl. Inst. Of Standards & Technology (NIST), Madison, USA; Dr. Charles K. Kankam, Professor of Civil Engg., Kwame Nkrumah University of Science and Technology, Kumasi, Ghana; Dr. (Ms.) Zakiah Ahmad, Associate Professor, Faculty of Civil Engineering, Universiti Teknologi Mara (UiTM), Malaysia; Dr. B. Ventkatrama Reddy, Department of Civil Engineering, IISc., Bangalore, India, and Dr. R. Siddique, Professor of Civil Engg. Dept., Thapur Institute of Technology (Deemed University), Patiala, India.

The author also thanks Dr. N. Parthasarathi, Reader, Department of Ecology and Environmental Sciences, Pondicherry University, Pondicherry, for providing some basic literature on natural fibres.

The author is grateful to DST, Govt. of India and AICTE, Govt. of India, for providing research funds under R&D scheme, which has helped to fabricate the experimental set-ups and also to carry out substantial part of the experimental investigation, reported in this Thesis. Without their financial assistance this project work could not have been carried out comprehensively and completed satisfactorily.
The author also thanks the family of Dr. T. Sundararajan for their kind understanding and patience shown, during the preparation of this Thesis.

The author also records his deep sense of gratitude to his wife Mrs. Sreevani, G., and their children Master Bhanumitra and Baby Sreelekha, for their understanding and patience shown, during the period of the research programme.

Finally, the author wishes to record his sincere gratitude to his beloved Parents, for their strong will, sacrifice and support which have contributed in shaping up his life and helped to attain the position what he his to-day. To them this Thesis is reverently dedicated.

GUDIAMELLA RAMAKRISHNA
