LIST OF TABLES

Table 1: Effect of column & temperature on retention

Table 2: Sample application parameter

Table 3: Scan mode with specification

Table 4: List of materials used & their sources

Table 5: List of instruments used & their sources

Table 6: Comparison of melting point

Table 7: Interpretation of Imipramine Hydrochloride (IMI) (FT-IR)

Table 8: Interpretation of Diazepam (DIA) (FT-IR)

Table 9: Comparison of reported $\lambda_{\text{max}}$ with obtained $\lambda_{\text{max}}$ of ETO & PCM

Table 10: Solubility Data of Imipramine Hydrochloride & Diazepam

Table 11: List of materials used & their sources

Table 12: List of instruments used & their sources

Table 13: Comparison of melting point

Table 14: Interpretation of Imipramine Hydrochloride (IMI) (FT-IR)

Table 15: Interpretation of Diazepam (DIA) (FT-IR)

Table 16: Comparison of reported $\lambda_{\text{max}}$ with obtained $\lambda_{\text{max}}$ of Imipramine Hydrochloride (IMI) & Diazepam (DIA)

Table 17: Solubility Data of Imipramine Hydrochloride & Diazepam

Table 18: Optimized RP-HPLC method chromatographic condition

Table 19: Selection of Mobile Phase

Table 20: Optimized Stress degradation studies conducted on Imipramine hydrochloride & Diazepam

Table 21: Forced degradation studies data of Imipramine hydrochloride & Diazepam by Proposed RP-HPLC Method
Table 22: System Suitability Test Results of Diazepam (DIA) Error! Bookmark not defined.

Table 23: System Suitability Test Results of Imipramine (IMI) Error! Bookmark not defined.

Table 24: Statistical analysis data of calibration curve Error! Bookmark not defined.

Table 25: Repeatability study Error! Bookmark not defined.

Table 26: Intraday & Interday Precision study for Imipramine Error! Bookmark not defined.

Table 27: Intraday & Interday Precision study for Diazepam Error! Bookmark not defined.

Table 28: Reproducibility data for Imipramine Error! Bookmark not defined.

Table 29: Reproducibility data for Diazepam Error! Bookmark not defined.

Table 30: Accuracy study Error! Bookmark not defined.

Table 31: Robustness study for Imipramine hydrochloride & Diazepam .... Error! Bookmark not defined.

Table 32: Various validation parameter & their acceptance criteria Error! Bookmark not defined.

Table 33: Summary of validation parameters Error! Bookmark not defined.

Table 34: Assay results of marketed formulation Error! Bookmark not defined.

Table 35: Optimization of mobile phase Error! Bookmark not defined.

Table 36: Optimized Densitometry Chromatographic Condition of HPTLC method. Error! Bookmark not defined.

Table 37: System suitability test parameters Error! Bookmark not defined.

Table 38: Optimized Stress degradation studies conducted on Imipramine hydrochloride & Diazepam Error! Bookmark not defined.

Table 39: Forced degradation studies data of Imipramine & Diazepam by Proposed HPTLC Method Error! Bookmark not defined.

Table 40: Result of calibration curve for Imipramine Error! Bookmark not defined.

Table 41: Result of calibration curve for Diazepam Error! Bookmark not defined.

Table 42: Statistical analysis data of calibration curve Error! Bookmark not defined.

Table 43: Repeatability study Error! Bookmark not defined.
Table 44: Intraday & Interday precision study for IMI
Table 45: Intraday & Interday precision study for DIA
Table 46: Reproducibility data for IMI (150 ng/spot)
Table 47: Reproducibility data for DIA (300 ng/spot)
Table 48: Accuracy study
Table 49: Robustness study for IMI & DIA
Table 50: Solution stability study
Table 51: Various validation parameter & their acceptance criteria
Table 52: Summary of validation parameters
Table 53: Assay results of marketed formulation
Table 54: Comparison of developed methods for Imipramine Hydrochloride
Table 55: Comparison of developed methods for Diazepam
