I have a great pleasure in recording my profound gratitude to my research guide, Dr. S. S. Thipse for his dynamic guidance, constant encouragement and immense help given at each and every step of pursuing this research work. His incisive comments, panegyric efforts, fruitful discussions, helping attitude and constant inspiration with a keen interest in the progress of the research work always edified me with jest to carry out my research work firmly. His words of solace and support during difficult times are ever remembered. Besides being an excellent research guide, I found him a very friendly, kind and caring person. To him, I am forever, indebted.

I am grateful to my research committee members, Dr. T. P. Singh, Dean, Faculty of Engineering, SIU; Dr. Manju Singh, Head PhD Program and Research Projects, SIRI, SIU; Dr. Arundhati Warke, PhD Co-coordinator and all the faculties of Symbiosis Institute of Technology (SIT), Pune for their critical comments, valuable support and new ideas during the course of my research work.

I take this opportunity to express my gratitude to Director, The Automotive Research Association of India (ARAI), Pune for permission to carry out the research work in this field of automotive exhaust emissions. I am also thankful to Mr. K. Srinivas, Head of Emission Laboratory & Sr. Deputy Director, ARAI; for allowing me to use unique and advanced emission test lab facility to carry out my research work in spite of their busy test schedule. I am also thankful to the managers, engineers and technical staff of emission laboratory and also from chemical laboratory, ARAI who have whole heartedly supported during vehicle preparation, actual emission testing, chemical analysis and data collection on the vehicles. I am also thankful to the vehicle owners who have agreed and allowed to use their vehicles for testing and made them available as per the testing schedule to complete the testing work on time. I am grateful to Mr. Subrato Rath from Indian
Statistical Institute for his valuable time and guidance to use Minitab 13 for data analysis and to develop mathematical model.

During this long process I can’t forget my colleagues Mr. Kishore Kavatkekar, Mr. Prasanna Bhat and Mr. Krishna Rao Patil, who were constant source of inspiration and motivation during this journey right from first day, I thank all of them and also to my colleagues from PhD scholar team for their support and valuable guidance from time to time.

All my family members and friends and teachers who always cherish me throughout my life and helped to keep my focus and balance whenever, I was getting diverted due to my busy schedule and constant touring for discharging the responsibilities and official goals. I take this opportunity to thank to my wife Rubina and daughter Tabassum who have taken care of me and also managed my household and social responsibilities allowing me to focus on this research work. Their patience and encouragement has always been a morale booster for me.

It’s impossible for me to forget my GOD ALMIGHTY who is always merciful and behind all these to bring me to this level from nothing, giving taste of varieties of situations and the phases of life.
