ACKNOWLEDGEMENT

As a matter of fact, I think it appropriate to acknowledge here some of my major debts to those without whose help and co-operation, I could not have made much progress in my research work.

In this effort, my main source of inspiration, encouragement and affectionate guidance has been none other than my research supervisor, Prof. (Mrs.) Savitri Verma Department of Biosciences, Himachal Pradesh University, Shimla. Her research expertise, logical and analytical excellences have contributed a lot in developing my scientific spirit. I am deeply indebted to her.

I am especially grateful to Prof. S. K. Sood, Chairman, Department of Biosciences for his official help and co-operation extended to me during the course of this study. My special thanks is also due to Late Prof. S. S. Katoch, Ex-chairman, for his superior influence and moral encouragement.

I reverently express my deep sense of gratitude to my revered parents Mrs. & Mr. G. C. Sharma and my sis. Nita & Nisha for their love, affection, moral courage and financial support they provided from time to time. Without their inspiration and encouragement, this dream of mine, would not have come true at all.

My friends and colleagues, whose innumerable suggestions, I used as tools in shaping the original scrawls into the present form will remain to share my gratitude. In this regard my research mates Dr. Pawan, Kiran, Sanjay, Murari, Sandeep and Dr. Chaman and my friend Rishu deserve due thanks. Also due thanks to Dr. V. K. Santvan, Lecturer, IIHS, who shared his research experiences with me during the course of this study.

Also, I wish to record the help and co-operation of Nittu Sharma and Achhuru Ram for typing the manuscript with diligent care and Mr. Ramesh Thakur for photomicrography.

Finally, I express my sincere gratitude and pay obeisance to God to make me so eligible to complete my work successfully.

Thanks to all

Rahul Bhardwaj
