Acknowledgements

First of all, I would like to pay my homage to Almighty; whose presence keep my spirit alive and who gave me opportunity, strength and sense of devotion to step toward the success.

My principal debt is to my respected guide and teacher Dr. Baljit Singh Assistance Professor Department of Chemistry Himachal Pradesh University Shimla-5, for not only giving me all the required guidance during my research time but has also inspired me to pursue the research work. His able guidance, keen interest, valuable advice, scientific and scholarly inquiry and enormous encouragement have brought this work in the present form.

I express my heartiest thanks to Prof. D.K. Sharma; present Chairperson and Prof. M.S Chauhan, former Chairperson Department of Chemistry for providing necessary laboratory and library facilities for this work.

I extend my special thanks to Dr. Sanjay, Dr. Nisha Sharma, Dr. Lok Pal, Ms. Ritu, Dr. Atul, Mr. Vikrant and Mr. Abhishek for their constant help and friendly care during the entire period.

And my greatest and sincerest indebtedness; as ever, is there to the constant struggle, lovable love, worthy hopes and firm beliefs of the ones who've brought me so far. None other than my parents and Grandmother whose blessings I always cherish and will keep on, as an impetus for life. Full blooded thanks to my brother Viju and sister Krishna and my friends, Anshu, Meenakshi and Sunita for the great love, harmonical co-operation and affection.

(Nirmala Chauhan)
