I started considering a PhD on the conflicts between humans and snow leopards when I was working on the Management Plan for the Upper Spiti Landscape. I am thankful to Yash Veer Bhatnagar and Charudutt Mishra who considered me for that project. Saying that Charu and Yash Veer have been influential in shaping my professional life is an understatement. You have been my role models, mentors and friends. I can never truly thank you for your support, encouragement and inspiration.

My PhD got a boost when the Students Conference on Conservation Science, Cambridge accepted my proposal to do an internship with Professor Stephen Redpath of the Aberdeen Center for Environmental Sustainability, Aberdeen University. I am thankful to SCCS Cambridge for this once in a lifetime opportunity. I spent a month in Aberdeen developing ideas for what were to be the next three years of my life. Steve encouraged me throughout this time and was the brightest spot in the otherwise gloomy Aberdeen weather. Anna Evely you were a great company in Aberdeen. Thank you for introducing me to Aberdeen University life and Becycles! I would like to thank Ana and Mark Reed of ACES for the many stimulating discussions on the use of social surveys in informing conservation.

The project got off the ground with support from the National Geographic Young Explorer Award, Rufford Small Grants, Snow Leopard Conservation Grant and Conservation Leadership Programme’s Future Conservationist Award. I am most thankful for their support which funded most of my field work in Spiti, Himachal Pradesh and Ladakh, Jammu & Kashmir. I am grateful to the Snow Leopard Trust that made possible my field and lab-work in Mongolia. I am also thankful to the Department of Science and Technology for supporting the lab-work.

I grateful to the people who have shaped my thinking and attitude toward science and conservation. I am thankful to Uma Ramakrishnan, National Centre for Biological Sciences for mentoring me and supporting the molecular biology aspects of this project. Since the first day of my M.Sc. and for the last six years Dr. Ajith Kumar has been a constant source of inspiration. At NCF, I have learned a lot and hope to learn a lot more from MD Madhusudan, Suhel Quader, TR Shankar Raman, Divya Mudappa, Aparajita Datta, Dr. Johnsingh, Pranav Trivedi, Pavithra Sankaran and all the others. I am also

thankful to Mahesh Sankaran and Jayshree Ratnam for your interest in my work and motivation. I am grateful to Anindhya 'Rana' Sinha; you have been a mentor and a friend (and foe for the water-polo games) since the time I stepped up to face the M.Sc. interviews in NCBS.

My friends and colleagues at NCF have been an important part of these last three years of my life. I am thankful to Rishi Sharma, Riyaz Ahmed, Narayan Sharma, Karthik Teegalapalli, Swati Siddhu, Vardhan Patankar, Amruta Rane, Elrika D'souza, Jahnavi Joshi, Abhishek Ghoshal, Ranjini Murali, Saloni Bhatia and Rohit Naniwadekar for the many great memories of these times. I am grateful to Rakhee Karumbaya and Smita Prabhakar for all the help with admin and the cheerful company in Mysore and Bangalore. I big thanks to Naveen Raj, M Shivakumar for the daily dose of evening sports and Mr. Vishwanath for all the help with the account books. I am grateful to R Raghunath for the help with GIS. I am thankful to Anand MO, Robin Vijayan, Manish Chandi, Mayank Kohli and Ashwin Vishwanathan for your interest in my work and suggestions.

Umesh Srinivasan, Nandini Velho, Tania Seshadri, Prashanth NS adopted me for my Bangalore visits during my field work years. I owe the biggest 'Thanks' to you guys. The discussions drawing parallels between conservation and public health helped me look at my own work in a much larger social context.

I am especially grateful to all my lab mates at NCBS, Prasenjeet Yadav, Vaibhav Chaturvedi, Priya Tamma, Debopriyo, Kritika Garg, Amruta Varudkar, Prachi Thatte, Nishma Dahal, Samrat Mondol. Lab work was my biggest weakness but with you guys around, I enjoyed every bit of my time in the lab and hope to have learned a few things along the way. I am especially grateful to Vaibhav and Prasen who taught me everything from storing a scat sample to genotyping.

Field work in the high Himalayas is always a big challenge. I am grateful to Rinchen Tobgay and Tandup Cherring for sharing all my adventures. I would never have braved the harsh weather and landscape of Lingti valley without your support. I am also grateful to Sushil Dorge, Tenzin Thinley, Tenzin Thinley (Kaza), Kalzang Gurmet, Dorge Tsewang, Tenzin Takpa, Tsering Dorge (Vaid), Chunnit Kesang, Pandan Rabgay, Zangpo, Lamaji. All of you were instrumental in getting valuable data in the field. Field work in

Ladakh would have never started without the help from Karma’le. A big thanks to Neha, Dincy, Nisarg, Sagar and George, your time in the field was helpful in both gathering data and enjoying the process. I owe a big thanks to all the Spitians for being so welcoming. Working in such a large landscape as Spiti would not have been possible without your hospitality.

I would like to thank the entire Himachal Pradesh Forest Department. I would like to especially thank A.K. Gulati, PCCF (WL) & CWLW, Vinay Tandon, PCCF (WL) & CWLW (Ex), R.K. Sood, PCCF (WL) & CWLW (Ex), Sanjeeva Pandey, A PCCF (Participatory Forest Management and FDA), R.K. Sood, CCF (WL), Satpal Dhiman, DFO (HQ), H.L. Rana, DFO (Kaza) (ex), Rajeev Sharma, DFO (Kaza), D.S. Chauhan, RFO (Kaza)

My time in the Mongolian Gobi was one of the best times in the field. I am grateful to Orjan Johansson for introducing me to the Gobi Desert and snow leopard collaring. I will always remember the biking in the desert, navigating the maze of dirt tracks, the endless wait for the collaring alarm to go off and the sausage and bread for every meal. Carol Esson, you were the best of friends that I made during my time in the Gobi. I am thankful to Bayara, Pujii, Nadia and Tuvshi for facing the red tape on my behalf. Sumbee, you were a great company in the mountains and deserts of Mongolia. Odbayar Tumendemberel for your help, both in the field and shopping on the streets of UlaanBatar. Mijji and Oyuna, you made every comfort possible in the Gobi. A special thanks to Koustubh Sharma for helping me with everything from tips on navigating the Gobi to looking at my manuscripts whenever needed.

I am grateful to Dr. Bazartseren Boldgiv, for hosting my academic work in Mongolia. Dr. Batjargal of the National University of Mongolia for making it possible for me to do lab work in Mongolia. Prof. Batjargal Batdorj of Institute of Biology, Mongolian Academy of Sciences for hosting me in your lab. A lot of my work in Mongolia would have never been possible without the support from all of you. I am thankful to Odsuren, you were the hero of the lab work in Mongolia. Many thanks to Natsuko Kimura, Odsuren and Odbayar for being such a great company throughout my stay in Ulaanbaatar.
Acknowledgement

Finally, my parents, Ramesh & Sunita Suryawanshi and my sister, Neha, who have been ever supportive of my interests and passions. My wife, Bhagyashree, for the encouragement, inspiration, tolerance and sacrifice. This thesis is dedicated to my family in much love.
