Preface ......................................................... xi  

## Chapter 1  Introduction

1.1 Introduction ............................................. 1  
1.2 Holographic Recording and Reconstruction .......... 3  
1.3 Mathematical Background ................................ 5  
1.4 Holographic Recording Materials ........................ 8  
1.4.1 Diffraction Efficiency .................................. 11  
1.5 Materials for Holographic Data Storage ................ 12  
1.5.1 Silver Halide Holographic Emulsion .................. 13  
1.5.2 Photopolymers ........................................... 15  
1.5.3 Photoresist ............................................. 16  
1.6 Application of Recording Materials ...................... 17  
1.6.1 Holographic Gratings ................................... 17  
1.6.2 Optocoupler ............................................. 23  
1.6.3 Optical Correlators ..................................... 24  
1.6.4 Holographic Data Storage .............................. 25  

## Chapter 2  Simulation and Fabrication of Holographic Grating in Different Recording Media

2.1 Introduction ............................................... 27  
2.2 Simulation and Development of Grating ................. 29  
2.2.1 Parameters Affecting Efficiency of Volume Bragg Gratings 29  
2.2.2 Simulated Model ......................................... 34  
2.2.3 Noise Reduction in Grating Using Apodisation ....... 39  
2.2.4 Grating Fabrication ..................................... 41  
2.3 Materials Used for Grating Recording .................... 42  
2.4 Investigation of the Recorded Gratings .................. 45  
2.4.1 Diffraction Efficiency ................................... 45
Chapter 3

PART A: Characterisation of Holographic Gratings Fabricated on Different Holographic Materials

3A.1 Introduction
3A.2 Experimental Details
3A.3 Result and Discussion
3A.4 Conclusion

PART-B: Design and Fabrication of a Three Way Optocoupler Using Holographic Grating

3B.1 Introduction
3B.2 Experimental setup for the Fabrication of Optocoupler
3B.3 Characterisation of the Recorded Holographic Optocoupler
3B.4 Conclusion

Chapter 4 Optical Phase Conjugation Properties in Dye Sensitised Silver Halide Using DFWM

4.1 Introduction
4.2 Chemical Structure of the Organic Dyes Used for Investigation
  4.2.1 Lissamine Green B
  4.2.2 Toluidine Blue O
  4.2.3 Methyl Red
4.3 Principle
4.4 Materials Preparation
4.5 Experimental Details
4.6 Results and Discussion
  4.6.1 Optical Characterisation of Silver Halide Plates Sensitised with Organic Dyes
  4.6.2 Phase Conjugated Wave Generation
4.7 Conclusion

Chapter 5 Development of SLM Based Holographic Data Storage and Retrieval

5.1 Introduction
5.2 Principle of Holographic Data Storage
5.3 Data Generation
5.4 Storage Modes
5.5 Experimental
5.5.1 Data Recording and Retrieval

5.6 Design of an Optical Correlator for Data Searching and Data Retrieving Using the Developed SLM

5.7 Result and Discussion

5.8 Fingerprint Identification using the Optical Correlator Developed

5.9 Conclusion

Chapter 6 Summary of Results and Future Scope for Work

6.1 Summary

6.2 Future Scope for Work
