ACKNOWLEDGEMENTS

I owe a deep sense of reverence to Bhagavan Sri Sathya Sai Baba, Chancellor, Sri Sathya Institute of Higher Learning (Deemed University), Prasanthinilayam, under whose munificent Grace, the entire project has been accomplished with an ardent and intense devotion.

I find words inadequate to express my deep sense of gratitude to Dr. S.K. Mann, Associate Professor of Botany, Department of Bio-Sciences, Himachal Pradesh University, Shimla-171005, under whose able and astute guidance, the work was completed with enthusiasm. She had a deep vision and insight of the problem and her constructive suggestions have been very helpful in completing this project.

I am indebted to Dr. H.C. Aggarwal and Dr. Surinder Pal for the keenness evinced by them during the progress of the work.

I am also grateful to: Dr. V.K. Rai, Chairman, Department of Bio-Sciences, Himachal Pradesh University for extending me the laboratory facilities needed for the project and the Director, F.R.I. Dehradun for providing me facilities to visit the herbarium and enabling me to identify my specimens.

Thanks are also due to my affectionate pupils Ms. Anita Gupta, Sudesh Chauhan and Vinay Sharma; Dr. R.P. Sharma (Senior Analytic Officer, Department of Horticulture, Shimla); and Dr. Milap Chand for the
assistance rendered during the course of the investigations; Mr. Gurcharan Singh Kochhar in particular, for the unassuming pains, he had undertaken in guiding me about the intricacies pertaining to photomicrography.

I duly acknowledge the love showered upon me by Dr. S.N. Saraf, Hon'ble Vice-Chancellor, Sri Sathyaa Sai Institute of Higher Learning (Deemed University), Prasanthinilayam and Dr. Delip Malhotra, Department of Psychology, Himachal Pradesh University, Shimla-171005, who played the pivotal role by infusing courage in me, so as to complete this work at an early date.

With overwhelming emotions I must thank my sisters; Sh. S.D. Bhardwaj and Mr. Vijay Pandit, for the kind hospitality extended to me, during my stay with them in the course of the current investigations. I shall never forget the pains taken by Shri R.K. Puri, Mr. Richard Eric Dean and Mr. Prem Singh for their various types of help during the completion of this manuscript. The memories of the time spent with Late Shri Tek Chand Negi, who has been my loving companion, shall ever remain fresh in my mind.

In the end, but the foremost, I am grateful to my parents to whom I owe the debt of birth and upbringing.

It is with their good wishes and blessings that I am going ahead with my aspirations in life.
