LIST OF TABLES

Table 2.1 Various phases and phase transition temperatures and transition enthalpy of liquid crystal dimers .......................................................... 32
Table 3.1 Various phases, transition entropy, enthalpy and density jumps of liquid Crystal dimers ........................................................................... 62
Table 3.2 Density jumps and the estimated values of pressure dependence of transition temperature(dT/dP K/kbar) at I – N transition of some liquid crystal compounds .......................................................... 64
Table 3.3 Density jump (Δρ/ρ%), transition enthalpy (ΔH/Jmol⁻¹) and pressure dependence of transition temperature(dT/dP K/kbar) at I – SmA transition of few mesogenic dimers and monomers .............................................. 66
Table 3.4 Density jump (Δρ/ρ%), and pressure dependence of transition temperature (dT/dP K/kbar) at SmA-SmF transition of few mesogenic dimers. .......................... 68
Table 4.1 Vibrational frequencies, b_L+2b_T values of various bonds .......................................................... 103
Table 4.2 Values of Σb_L, Σb_T and (Σb_L - Σb_T) of 6.O12O.6 and 7.O12O.7 ................................................................. 104
Table 4.3 Principal Parallel, perpendicular components and mean Polarizabilities (x10⁻²⁴ cm³) of 6.O12O.6 and 7.O12O.7 ................................................................. 105
Table 4.4 The molecular polarizabilities and polarizability anisotropy (α_e-α_o) in 6.O12O.6 .................................................................................. 108
Table 4.5 The molecular polarizabilities and the polarizability anisotropy (α_e-α_o) in 7.O12O.7 .................................................................................. 109
Table 4.6 Percentage of deviations of order parameter, S estimated assuming the two field models and using different methods from that obtained using ∆n, the birefringence in perfect order in two dimeric compounds .................................................. 112
Table 5.1 Different Raman bands of 6.O6O.6 and 6.O12O.6 at room temperature ................................................. 125
Table 5.2 Different Raman bands of 7.O4O.7, 7.O5O.7 and 7.O6O.7 at room temperature ................................................. 126
Table 5.3 The variation of peak positions and integrated intensity of the different modes in 6.O6O.6 as a function of temperature .................................................. 129
Table 5.4 Peak positions of different modes in 7.O6O.7 as a function of temperature ................................. 131
Table 5.5 Integrated intensities of different modes in 7.O6O.7 as a function of temperature ................................. 132
Table 5.6 Linewidth of different modes in 7.O6O.7 as a function of temperature ................................. 133
