<i>List of Figures</i>	ix
<i>List of Tables</i>	xi
<i>List of Symbols and Abbreviations</i>	xii
Chapter 1 : Prologue	1
1.1 Introduction	1
1.2 Problem Statement	3
1.3 Research Objectives	5
1.4 Organization of the thesis	6
Chapter 2: Multi Attribute Decision-Making: A survey	8
2.1 Introduction	8
2.2 Characteristics of MCDM	9
2.3 Comparison matrix	10
2.4 Methods of MCDM	11
2.4.1 Analytic Hierarchy Process (AHP)	11
2.4.2 Simple Additive Weighting(SAW)	14
2.4.3 Weighted Product Method(WPM)	14
2.4.4 Technique for Order Preference by Similarity to Ideal Solution (TOPSIS)	14
2.4.5 Elimination and Choice Translation Reality(ELECTRE)	16
2.4.6 Preference Ranking Organisation Method for Enrichment Evaluation(PROMETHEE)	16
2.5 Fuzzy set theory in MCDM problem	18
2.5.1 Fuzzy set theory	19

2.6	Applications of FMCDM methods	19
2.7	Multi Criteria Group Decision-Making (MCGDM)	25
2.8	Summary of findings	29
Chapter 3: Multi Criteria Decision-Making in ranking of life insurance Companies in India by using fuzzy TOPSIS		33
3.1	Introduction	33
3.2	Problem Defination	35
3.3	Traingular Membership Function(MF)	36
	3.3.1 Distance between fuzzy triangular numbers	37
3.4	Linguistis variables	37
3.5	Propose model for ranking of insurance companies	38
	3.5.1 Process for selection of insurance policy	38
	3.5.2 Process for selection of criteria	38
	3.5.3 Process for selection of alternatives	39
	3.5.4 Ranking life insurane companies using Fuzzy TOPSIS	39
3.6	Method	42
3.6.1	Participants	42
3.6.2	Numerical representation	43
3.7	Sensitivity analysis	52
3.8.	Conclusion	53
Chapter 4 : Fuzzy multi-criteria decision-making using machine learning approach on diabetic disease		54
4.1	Introduction	54
4.2	Research Background	55
4.3	Motivation	55
4.4	Objectives	56
4.5	Problem Statement	56

Chapter 5: Comparative Risk Analysis on Prediction of Diabetes Dieses	57
5.1 Introduction	57
5.2 Literature Survey	58
5.3 Methodology	59
5.3.1 Dataset	59
5.3.2 Adaptive Neuro-fuzzy Inferences System	59
5.3.3 Artifitial Neural Network using Levenberg Marquardt Back Propagation Algorithm	62
5.4 Results and Discussion	67
5.4.1 Results of Adptive Neuro-Fuzzy Inference System	67
5.4.2 Results of Artifitial neural Network using Levenberg Marquart Back Propagation Algorithm	71
Chapter 6: Classification of Diabetes Disease using Neural Network and Support Vector Machine	73
6.1 Intorduction	73
6.2 Literature Survey	74
6.3 Artifitial Neural Network using Scaled Conjugate Gradient Back Propagation Algorithm	75
6.4 Support Vector Machine	75
6.5 Results of Artifitial Neural Network using Scaled Conjugate Gradient Back Propagation Algorithm	78
6.6 Results of Support Vector Machine	80
Chapter 7: Epilogue	85
7.1 Analysis and Interpretation	85
7.2 Summary of work	88
7.3 Future scope of the work	89
7.4 Implication	89
7.5 Limitation	90
Refernces	91-99
Appendix A: Claim ratio for different life insurance companies	100
Appendix B: Questionnaire for Study -1	102
Appendix C: Questionnaire for Study -2	110
Appendix D: Dataset for study-2	111
