ACKNOWLEDGEMENTS

With utmost sincerity and gratitude, I would like to thank my mentor, **Prof. K. Dharmalingam**, for having guided me through this research endeavor. Coming from a different background, I have learnt everything what I know today from none other than him. He has taught me the right way of approaching a problem and working on it as well as the do’s and the don’ts in research. He had always been a constant source of inspiration and will continue to do so. His thoughtful steering throughout the course of this study as and when significant scientific findings most relevant to this study occurred elsewhere, had motivated me immensely. I would always be grateful to him for imparting his knowledge and for having given me this wonderful opportunity to work under him. I express my sincere thanks for his understanding and support during the most difficult times.

I thank **Dr. Ranjan Prasad** for being very supportive and helpful at all times and for all his valuable suggestions. I thank **Prof. V.R. Muthukaruppan**, who had been very helpful with his insights and critical suggestions during the discussions and for providing support from AMRF. I am very grateful to **Dr. C. N. Paramasivan** and **Ms. Daisy Vanitha**, who had taught me the basics of mycobacterial work during my training period in Tuberculosis Research Center, Chennai. I would like to express my sincere thanks to **Dr. Shankernarayan**, VHS, Erode for his help and support. I am very thankful to **Dr. D. Karunagaran**, IIT Madras, Chennai for kindly providing a cell line as well as for the useful discussions.

I thank all the faculties at the School of Biotechnology, **Dr. S. Krishnasamy**, **Dr. K. Veluthambi**, **Dr. P. Palanivelu**, **Dr. A. K. Gupta**, **Dr. R. Usha**, **Dr. Jebakumar**, **Late Dr. Rafi** and **Dr. Shakila** for their support, critical comments and discussions during the presentations and otherwise also.

I would like to extend my sincere thanks to **Dr. Santhosh**, **Dr. Chitra**, **Mr. Ram kumar**, **Mrs. Periyanayaki** and **Mrs. Sasikala** who had taught me the basic techniques at the early stage of this work. My sincere thanks to **Dr. Nishma Gupta**, who had introduced me and taught me the animal cell culture techniques. I would like
to specially thank Mrs. E. A. Rehna, Dr. Lini, and Dr. Shibu whose constructs had formed the basis of this work.

I am very thankful to Rabbind for the many useful discussions and the support he has provided during this work. I would like to extend my heartfelt thanks to him for assisting me in various experiments and for all his timely suggestions.

My very special thanks are due to Bini for all her suggestions and lively discussions. I think back with gratitude for all the moral support and help she has rendered at the most crucial and critical times. I thank her immensely for critically reviewing and helping me with the thesis correction.

I would like to extend my thanks to Balaganapathy and Shankar for their timely support and help. I also thank Ajith, Rashmi, Delfin, Vinod Prabu, Karupasamy, Ravikanth, Ashok, Mathan, Bhargavi and Preeja. I am thankful for all the help rendered by Valarnila, Arun, Anandhi and Dr. Gowripriya from Aravind Medical Research Foundation.

My special thanks to Mrs. Amirthavalli for her care and for easing the burden of administrative works. I am thankful to Mr. K. Rajendran, Mr. Radha Krishnan, Mr. Vinoth, Ms. Nalini and Mr. Jaysingh for helping me with the official work. I would like to thank Mr. Prabakaran, Ms. Nagarani, Mr. Subash, Mr. Rajendran, Mr. Raja, Mrs. Mekala, Mr. Raguram, Mr. Nagoor Meeran and all the staffs of SBT and BIC.

I express my sincere thanks to Mr. A. Ganesan, who had always been helpful and for providing a lively atmosphere in the media kitchen. I thank Mr. Pandi, Mr. Sivasami, Mr. Rajendran and Mr. Pitchai for their help all through.

I consider myself very lucky to have Amir, Aslam and Suhas in my life – three wonderful persons who made me believe in my strength and who stood by me during the most difficult times in life. I am greatly indebted to the love, care and affection they have been showering on me and for making me a strong person. The word “thanks” is just not enough to express my gratitude for them. A very special thanks to Amir for providing me with countless number of reprints. I am grateful and thankful for the support offered by my friends, Malini, Priya, Sri and Radha.
The first seed of interest in research was laid in me by my Father and I am very thankful and grateful to him for what I am today. This research work is indeed his dream and I am glad that I could make his dream come true. I am very much indebted to my Mother who had always been practical and understanding, and for providing me the much needed support at all times. I thank God for having blessed me with a wonderful brother, Ram who had supported me emotionally, financially and stood by me always. If not for him, I wouldn’t have reached this far.

This acknowledgement wouldn’t be complete unless I express my gratitude to Goddess Meenakshi, whom I believe with great faith.

This study was enabled by the financial assistance provided by the Indian Council of Medical Research and University Grants Commission and I gratefully acknowledge them.

J Jeya Maheshwari
