APPENDIX

Reviews papers starting from 1967:

[2]. Hussain, A. B. B. [Supervised by Malcolm Povey] (1982), An Investigation into the Use of Ultrasonics to Monitor Phase Changes and Dilatations in Fats and Oils, Editor A. B. B. Hussin, Leeds PhD, LEEDS.
[8]. Daniella Valeri and Antonio J.A. Meirelles*, Viscosities of Fatty Acids, Triglycerides, and Their Binary Mixtures Department of Food Engineering, Campinas State University, Campinas, São Paulo, Brazil, 13083-970, JAOCS October 1997.
[9]. John N. Coupland1 and D. Julian McClements*Physical Properties of Liquid Edible Oils, Biopolymers and Colloids Research Laboratory, Department of Food Science, University of Massachusetts, Amherst, Massachusetts 01003, JAACS December 1997.
[10]. Y.B. Che Man* and M.H. Moh, Determination of Free Fatty Acids in Palm Oil by Near-Infrared Reflectance Spectroscopy, Department of Food Technology,
Faculty of Food Science and Biotechnology, Universiti Putra Malaysia, 43400 UPM Serdang, Selangor, Malaysia, JAOCS May 1998.

Faculty of Food Science & Biotechnology, Universiti Putra Malaysia, Serdang, Selangor, Malaysia, and Indonesian Oil Palm Research Institute, Medan 20001, Indonesia, JAOCS July 1998.

[13] Ratjika Chanamai and D. Julian McClements, Ultrasonic Attenuation of Edible Oils, Biopolymers and Colloids Research Laboratory, Department of Food Science, University of Massachusetts, Amherst, Massachusetts 01003, JAOCS October 1998.

[17] C.P. Tan and Y.B. Che Man, Quantitative Differential Scanning Calorimetric Analysis for Determining Total Polar Compounds in Heated Oils, Department of

[20]. He Voort a*, A.A. Ismail a, J. Sedman a, R. Cox b, C. Simard b, and H. Buijeb, McGill Discrimination of Edible Oil Products and Quantitative Determination of Their Iodine Value by Fourier Transform Near-Infrared Spectroscopy, IR Group, Department of Food Science and Agricultural Chemistry, Macdonald Campus, McGill University, Ste. Anne de Bellevue, Québec, Canada H9X 3V9, and bBomem, Québec, Québec, JAOCS January 2000.

[21]. C.P. Tan and Y.B. Chgy, Differential Scanning Calorimetric Analysis of Edible Oils: Comparison of Thermal Properties and Chemical Composition, Faculty of Food Science and Biotechnology, Universiti Putra Malaysia, 43400 UPM Serdang, Malaysia, JAOCS February 2000.

[22]. Cristina González, José Ma. Resa, and Juan Lanz, Excess Volumes of Binary Mixtures That Contain Olive Oil with Alkyl and Vinyl Acetates, Departament of Chemical Engineering, Facultad de Farmacia, Universidad del País Vasco, 01007 Vitoria, Spain, JAOCS September 2000.

[23]. Hui Li a, F.R. van de Voort a*, A.A. Ismail a, J. Sedman a, and R. Cox b, aMcGill, Trans Determination of Edible Oils by Fourier Transform Near-Infrared Spectroscopy, IR Group, Department of Food Science and Agricultural Chemistry, Macdonald Campus of McGill University, Saint Anne de Bellevue, Québec, Canada H9X 3V9, and bBomem Inc., Québec, JAOCS October 2000.

[24]. Nikolaos B. Kyriakidis and Theophanis Katsiloulis, Calculation of Iodine Value from Measurements of Fatty Acid Methyl Esters of Some Oils: Comparison with
the Relevant American Oil Chemists' Society Method, Universiti Sains Malaysia, 11800 Penang, Malaysia, JAOCs December 2000.

[25]. Gül Wehling a, *, and Susan L. Cuppett, Method for Determining Oxidation of Vegetable Oils by Near-Infrared Spectroscopy, Department of Food Science & Technology, University of Nebraska, Lincoln, Nebraska 68583-0919, and b Olive Culture Research Institute, Universite Cd. No. 43, Bornova/Izmir, Turkey 3500, JAOCs May 2001.

[27]. C.P. Tan a, Y.B. Che Man b,*, S. Jinap b, and M.S.A. Yusoff b, Effects of Microwave Heating on Changes in Chemical and Thermal Properties of Vegetable Oils, Departments of a Food Technology and b Food Science, Faculty of Food Science and Biotechnology, Universiti Putra Malaysia, 43400 UPM Serdang, Selangor D.E., Malaysia, and c Malaysian Palm Oil Board, Bandar Baru Bangi, 43000, Kajang, Selangor D.E., Malaysia.

[29]. Cristina González*, José M. Resa, Juan Lanz, and M. Angeles Fanega, Excess Molar Volumes and Refractive Indices of Mixtures Formed by Acetates with Sunflower Oil at Different Temperatures, Chemical Engineering Department, Faculty of Pharmacy, University of Basque Country, Vitoria, Spain, JAOCs June 2002.

[30]. Cristina González*, José M. Resa, Juan Lanz, and M. Angeles Fanega, Speed of Sound and Isentropic Compressibility of Organic Solvents + Sunflower Oil Mixtures at 298.15 K, Chemical Engineering Department, Faculty of Pharmacy, University of the Basque Country, Vitoria, Spain, JAOCs June 2002.

[31]. Tong Wang a,*, and Jenni L. Briggs b, Rheological and Thermal Properties of Soybean Oils with Modified FA Compositions, Departments of a Food Science
and Human Nutrition and Agricultural and Biosystems Engineering, Iowa State University, Ames, Iowa 50011, JAOCS August 2002.

[32]. G. Setiowaty and Y.B. Che Man*, Determination of Slip Melting Point in Palm Oil Blends by Partial Least Squares and Principal Component Regression Modeling of FTIR Spectroscopic Data, Department of Food Technology, Faculty of Food Science and Biotechnology, Universiti Putra Malaysia, 43400 UPM, Serdang, Selangor DE, Malaysia, JAOCS November 2002.

[35]. Ahmed Al-Alawi, Frederick R. van de Voort*, and Jacqueline Sedman, New FTIR Method for the Determination of FFA in Oils, McGill IR Group, Department of Food Science and Agricultural Chemistry, Macdonald Campus of McGill University, Sainte-Anne-de-Bellevue, Québec, Canada H9X 3V9, JAOCS May 2004.
