# CONTENTS

## CHAPTER - I  1 - 64
- General Introduction of selected drugs and analytical utility of chromogenic reagents used for their Assay.

1.01 - Selected Drugs.
1.02 - Typical Instrumental Techniques.
1.03 - Classification of Functional groups in Drugs.
1.04 - Classification of Organic reactions.
1.05 - Selection of reagents for Organic analysis.
1.06 - Features of Chemical reactions and reagents of interest.
1.07 - Chemistry of reagents used in the present investigation.
1.08 - General methodology for the development of new visible spectrophotometric methods.

## CHAPTER - II  65 - 154
- New visible spectrophotometric methods for the assay of Gatifloxacin.

2.01 - Introduction
2.02 - Experimental
2.03 - Results and Discussion
2.04 - Conclusions

## CHAPTER - III  155 - 194
- New visible spectrophotometric methods for the assay of Reboxetine methane sulphonate.

2.01 - Introduction
2.02 - Experimental
2.03 - Results and Discussion
2.04 - Conclusions
CHAPTER - IV

- New visible spectrophotometric methods for the assay of Oxybutynin chloride.

  2.01 - Introduction
  2.02 - Experimental
  2.03 - Results and Discussion
  2.04 - Conclusions

CHAPTER - V

- Some New visible spectrophotometric methods for the determination of Famciclovir.

  2.01 - Introduction
  2.02 - Experimental
  2.03 - Results and Discussion
  2.04 - Conclusions

CHAPTER - VI

- Some New visible spectrophotometric methods for the determination of Stanozolol.

  2.01 - Introduction
  2.02 - Experimental
  2.03 - Results and Discussion
  2.04 - Conclusions

SUMMARY
