After all these years of research life in CUSAT, I’ve got quite a list of people who contributed in some way to this thesis, for which I would like to express thanks.

I put into words my sincere gratitude to my research guide Dr. K.Y. Mohammad Salih for giving me a chance to enter the world of research and pursue my goal.

Special Gratitude goes to Dr. A.V. Saramma, Head, Department of Marine Biology, Microbiology and Biochemistry, for her enthusiastic attitude towards my work. I especially thank her for the prompt helps she always rendered.

During the correction phase of my thesis Dr. A. Mohandas, Emeritus Professor, National Center for Aquatic Animal Health, CUSAT, guided me through the subtleties of fact oriented scientific writing. Throughout my thesis-writing period, he provided encouragement, sound advice, and lots of good ideas. Thank you so much sir, for your lessons of perfect style.

I also wish to express my appreciation to Dr. Babu Philip, Dr. C.K. Radhakrishnan, Dr. A.A. Mohammad Haatha, Dr. S. Bijoy Nandan and Dr. Anneykutty Joseph who made many valuable suggestions and gave constructive advice.

I am especially grateful to Dr. Rosamma Philip for her constant vigilance that motivated me to keep myself updated with recent of references.

I am forever obliged to Dr. K.C George, Principal scientist, CMFRJ for the immense help rendered during the interpretation of histological sections. Sincere thanks to him on behalf of devoting his precious time and made many valuable suggestions which indeed helped in improving my awareness on invertebrate histology.

Statistics being extra disciplinary, I sought the genius of experts to learn and perform the task, I thank Mr. Steffy Thomas, Dept. of Statistics, CUSAT for the patience and perseverance he showed in teaching me the basics and helping me to solve the puzzle called ‘statistics’.

Some people have been invaluable on the practical side of things; I am thankful to Mr. K.B. Padmakumar (CUSAT) for providing algal feeds for the experimental animals which left them robust for experiments. Thanks to Dr. Girish R (CMFRJ) for rendering help in collecting test animal Perna viridis and enlightening me with useful tips on their maintenance and acclimatization.

My deep sense of gratitude is expressed to Abhilash K.S. (CIBA) for the valuable helps he did during the preparation of histological section.

I thank librarian Mr. Manual, School of Marine Sciences for the encouragement and support.
I record my sincere thanks to Mr. Sajeevan, Mr. Nazar and Mr. Salim, staff, school of marine sciences for their well timed helps which enabled me to carry out my work without impediments.

Thanks to Mr. Pushpakaran, Mr. Karthikeyan and Mr. Suku for their kind cooperation in obtaining Perna viridis from its natural bed is sincerely acknowledged.

The stimulating environment of “wet lab” was a constant source of ideas and encouragement. Thanks to all my colleagues.

I especially thank my colleagues at Department of Marine biology, Microbiology and Biochemistry and particularly Abdul Jaleel and Roja Sebastian for making my research times something to be remembered of. Jaleel, I simply fail to put into words my deep appreciation to you for all the helps you naturally did during the beginning of my experiments. I thank Roja with all the truth of my heart for the kind of boundless friendship and support she gave me whenever I was in need.

I convey thankfulness to my colleagues Keshavan Nambudiri, Selvan, Dr. Soja Louis, Cilla Abraham, Sreedia N.K, Vrinda, Manjusha, Gisha Sivan, Nikitha, Gigi, Anil Kumar, Animol, Reshmi, and Sudheer. N.S for their good company and for the helps each of them individually did during my research life in CUSAT.

My colleagues Jini Jacob and Smitha C.K were always at the helping end and I cherish their timely helps which lessened much of my tasks-to-meet. I thank Subitha Prabhakaran for the well timed helps she did during the final stages of thesis preparation. I thank Rekha.R.Nair and Shubhasree Shankar for the merry fun filled times we had at Athulya hostel.

Sincere thanks to my friend Mrs. Anupama Nair who never lost a chance to remind and push me to the completion of thesis. Her work plans and deadlines helped me a lot. She was a constant source of encouragement and any conversation with her left me more informative.

My work would have been impossible if my best friend Haridevi was not there to shoulder a larger burden. Her help, suggestions, advice and criticisms always gave me a spark of idea in work. I am happy but for the very special person she is and I am grateful for the unselfish and unconditional bond we share.

I cannot finish without saying how grateful I am with my daddy, mummy and siblings Prajul and Bava who have given me a loving environment where to develop. Particular thanks, of course, to my loving sister Shanu.

To the Lord Krishna, the inestimable, the sublime, I dedicate this simple work of mine!
