

LIST OF TABLES

S1. No.	TABLES	PAGE No.
1.	Summary of Data Collection Tools and Techniques	87
2.	Procedure for data collection (Experimental Group)	101
3.	Procedure for data collection (Control Group)	102
4.	Description of samples (primigravida mothers) based on their demographic characteristics in terms of frequency and percentages in both the groups	111
5.	Frequency and percentage distribution of the PRETEST knowledge score of primigravida mothers in control and experimental group regarding labor process and child birth preparedness	116
6.	Mean, Median, Mode, SD and Range of score of the PRETEST knowledge score of primigravida mothers in control and experimental group regarding labour process and childbirth preparedness	117
7.	Frequency and percentage distribution of the POST TEST knowledge level of primigravida mothers in control and experimental group regarding labour process and childbirth preparedness	119
8.	Mean, Median, Mode, SD and Range of score of the POST TEST knowledge score of primigravida mothers in control and experimental group regarding labour process and childbirth preparedness	120
9.	Frequency and percentage distribution of the PRETEST & POSTTEST knowledge level of	122

Sl. No.	TABLES	PAGE No.
	primigravida mothers regarding labour process and childbirth preparedness in experimental & control group	
10.	Mean and Standard Deviation of PRE TEST & POST TEST knowledge score among the primigravida mothers in Experimental and Control group	124
11.	Mean, Mean Difference, Standard Deviation and "t" value of PRETEST knowledge Scores of primigravida Mothers in Experimental and Control group	125
12.	Mean, Standard Deviation, Mean Difference and "t" value of Pretest and Posttest knowledge Scores of primigravida Mothers in Control group	126
13.	Mean, Standard Deviation, Mean Difference and "t" value of Pretest and Posttest knowledge Scores of primigravida Mothers in Experimental group	127
14.	Comparison of area wise knowledge scores in pretest and posttest among the primigravida mothers of experimental group	128
15.	Mean Difference, Standard Deviation and "z" value of change in knowledge scores of primigravida mothers in experimental and control groups	130
16.	Comparison of change in area wise knowledge scores of primigravida mothers in experimental and control groups	132
17.	Frequency & Percentage distribution of compliance to the intra-partum behaviour of the primigravida mothers in experimental and control group at the time of reporting to the	135

Sl. No.	TABLES	PAGE No.
	labour room	
18.	Mean, SD and 'z' value of compliance to the intra-partum behaviour score of the primigravida mothers in experimental and control group	136
19.	Mean, SD and 'z' value of item wise compliance to the intra-partum behaviour of the primigravida mothers at the time of reporting to the labour room in experimental and control group	137
20.	Frequency & Percentage distribution of compliance to the intra-partum behaviour of the primigravida mothers in experimental and control group in all the four stages of labour	139
21.	Mean, SD and 'z' value on compliance to the intra-partum behavior among the primigravida mothers in experimental and control group in all the four stages of labour	140
22.	Mean, SD and 'z' value of item wise compliance to the intra-partum behavior in FIRST STAGE OF LABOUR among the primigravida mothers in experimental and control group	141
23.	Mean, SD and 'z' value of item wise compliance to the intra-partum behavior in SECOND STAGE OF LABOUR among the primigravida mothers in experimental and control group	144
24.	Mean, SD and 'z' value of item wise compliance to the intra-partum behavior in THIRD STAGE OF LABOUR among the primigravida mothers in experimental and control group	145
25.	Mean, SD and 'z' value of item wise intra-partum behavior in FOURTH STAGE OF LABOUR among	146

Sl. No.	TABLES	PAGE No.
	the primigravida mothers in experimental and control group	
26.	Comparison of the maternal outcome criteria among the primigravida mothers in experimental and control group by frequency and percentage	149
27.	p-hat, q-hat, SE and 'z' value of proportion of primigravida mothers taking pain relieving drugs in experimental and control group	153
28.	p-hat, q-hat, SE and 'z' value of proportion of primigravida mothers as per their mode of delivery in experimental and control group	154
29.	Mean, SD and 'z' value of total duration (in minutes) of labor among the primigravida mothers in experimental and control group	156
30.	p-hat, q-hat, SE and 'z' value of proportion of primigravida mothers in experimental and control group according to the presence of maternal complications	157
31.	Comparison of the fetal outcome criteria among the primigravida mothers in experimental and control group by frequency and percentage	159
32.	p-hat, q-hat, SE and 'z' value of proportion of newborn cried immediately at birth in experimental and control group	161
33.	Mean, SD and 'z' value of APGAR score at 1 minute of birth among the newborns in experimental and control group	162
34.	Association of knowledge with demographic variables	164

LIST OF FIGURES

Sl. No.	FIGURES	PAGE No.
1	MMR magnitude & causes	8
2	Maternal Mortality in India	9
3.	Causes of Neonatal Mortality in India	10
4	Conceptual framework of the study based on Orem's self care deficit theory (supportive educative)	27
5	Description of components of Dorothea Orem's self care model in the study	32
6	Symbolic Representation of the Research Design	78
7	Schematic representation of the research design	79
8	Bar diagram showing the percentage distribution of the primigravida mothers according to their PRETEST level of knowledge regarding labour process and childbirth Preparedness in both the groups	118
9	Bar diagram showing the percentage distribution of the primigravida mothers according to their POST TEST level of knowledge regarding labour process and childbirth preparedness in both the groups	121
10	Cylinder diagram showing the percentage distribution of the primigravida mothers according to their knowledge level in PRETEST & POSTTEST for both the groups	123
11	Bar diagram showing the average change in the knowledge score of the primigravida mothers	131

Sl. No.	FIGURES	PAGE No.
	in experimental & control group.	
12	Bar diagram showing the proportion of the primigravida mothers as per their use of pain relieving drugs during labour in experimental & control group	152
13	Cylinder diagram showing the proportion of the primigravida mothers as per their mode of delivery in experimental & control group	154
14	Cylinder diagram showing the average duration of labour among the primigravida mothers in experimental & control group	155
15	Bar diagram showing the proportion of primigravida mothers in experimental & control group as per their presence of maternal complications (perineal injury)	157
16	Cone diagram showing the proportion of newborn cried immediately at birth in experimental & control group	161

LIST OF APPENDICES

APPENDIX	TITLE	PAGE NO
I	Ph. D registration letter	214 - 216
II	Approval letter received from the ethical committee (University)	217
III	Ethical committee report	218
IV	Letter seeking permission to conduct the study	219
V	Permission letter from Pune Municipal Corporation (PMC) to conduct the study	220 - 221
VI	Letter requesting Validation of the tool	222
VII	Certificate of Validation	223
VIII	List of Expertise for validating the tool	224 - 226
IX	Certificates for translation	227 - 228
X	Patient information sheet & Consent letter (English)	229 - 234
XI	Patient information sheet & Consent letter (Marathi)	235 - 236
XII	Data Collection tool (English) including blue print & answer key	237 - 251
XIII	Data Collection tool (Marathi)	252 - 268
XIV	Consent letter from the person enacted as antenatal mother for the video	269
XV	Consent letter of the trained observer	270 - 271
XVI	Content on labour process and child birth preparedness	272 - 287
XVII	Editing certificate	288
XVIII	Certificate of auditory and visual clarity of the video	289
XIX	DVD of the Video Assisted Teaching ---- English ---- Marathi	Inside of Back Cover
