LIST OF FIGURES

Figure 2-1 Global Individual Wealth.................................................................36
Figure 2-2 Distribution of Individual Wealth in Financial Assets......................38
Figure 2-3 Distribution of Individual Wealth in Physical Assets .....................39
Figure 2-4 HNWI Population In Asian Countries...........................................40
Figure 2-5 Theory of Reasoned Action.............................................................41
Figure 3-1 Research Model - Wealth Management Behavior Model..................77
Figure 3-2 HNWI Population in Asian Countries..........................................83
Figure 4-1 Attitude and its measured variables ..............................................130
Figure 4-2 Risk Appetite and its measured variables ......................................132
Figure 4-3 Subjective Norms and its measured variables..............................134
Figure 4-4 Beliefs and its measured variables.................................................136
Figure 4-5 Investment Behavior and its measured variables.........................138
Figure 4-6 Investment Behavior and its measured variables.........................139
Figure 4-7 Standardized Estimates and Correlation for Latent Constructs ........146
Figure 4-8 Wealth Management Behavior Model with Unstandardized Estimates..149
Figure 4-9 Wealth Management Behavior Model with Standardized Estimates....150
Figure 4-10 Standardized Estimates of Initial Moderation Interaction Model ......156
Figure 4-11 Unstandardized Estimates of Initial Moderation Interaction Model.....156
Figure 4-12 Unstandardized Estimates of Initial Interaction Model .................157
Figure 4-13 Standardized Estimates of Initial Moderation Interaction Model ......158
Figure 4-14 Nature of Interaction Relationship..............................................159
Figure 4-15 Mediation - Direct Effects Model..................................................163
Figure 4-16 Mediation - Indirect Effects Model..............................................164
Figure 5-1 Wealth Management Behavior Model...........................................187
Figure 5-2 Nature of Interaction Relationship...............................................189
Figure 5-3 Moderation Interaction Model......................................................190
Figure 5-4 Direct Path Relationship...............................................................191
Figure 5-5 Indirect Path Relationship.............................................................193
LIST OF TABLES

Table 3-1 Description of Research Methods and Sampling techniques Used...........85
Table 3-2 Items used to measure Financial Literacy ........................................89
Table 3-3 Items used to measure Beliefs ..........................................................89
Table 3-4 Items used to measure Risk Appetite ..............................................90
Table 3-5 Items used to measure Subjective Norms .......................................91
Table 3-6 Items used to measure Attitude .........................................................92
Table 3-7 Items used to measure Investment Behavior ..................................93
Table 3-8 Research Variables and Corresponding Questionnaire sections ........93
Table 3-9 Summary of Reliability Analysis ......................................................100
Table 3-10 Observed AMOS Output - Detection of Outliers .......................105
Table 3-11 Assessment of Normality ...............................................................108
Table 3-12 Multi-Collinearity Results (VIFs) ..................................................111
Table 4-1 Statictics of Cronbach's Alpha and Inter-Item Correlation ...............115
Table 4-2 Demographic Profile of the Investors ............................................116
Table 4-3 Investor's preferred Wealth Management Services/Products ............118
Table 4-4 KMO and Bartlett's Test ................................................................120
Table 4-5 Summary of Rotated Component Matrix and Cronbach's Alpha and Variance .................................................................122
Table 4-6 Constructs in the Research Model ......................................................125
Table 4-7 Summary of Model Fit measures used in the research ....................129
Table 4-8 Standardized Regression Weights - Attitude ....................................131
Table 4-9 Standardized Regression Weights - Risk Appetite .........................133
Table 4-10 Standardized Regression Weights - Subjective Norms ..................135
Table 4-11 Standardized Regression Weights - Beliefs ....................................137
Table 4-12 Standardized Regression Weights - Investment Behavior ..........139
Table 4-13 Standardized Regression Weights - Financial Literacy .................140
Table 4-14 Summary of Model Fit Indices of each Construct..........................141
Table 4-15 Squared Multiple Correlation (SMC) of 61 measured variables .......... 143
Table 4-16 Validity Results .................................................................................. 145
Table 4-17 Regression Weights for the Initial Model ........................................ 151
Table 4-18 Squared Multiple Correlations ............................................................ 152
Table 4-19 Standardized Regression Weights for Research Constructs and Mediate Variables ........................................................................................................ 152
Table 4-20 Covariance Between the Predictor Variables .................................... 153
Table 4-21 Regression Weights for All Variables ................................................ 157
Table 4-22 Regression Weights all Variables ....................................................... 158
Table 4-23 Unstandardized Regression Coefficients ............................................ 159
Table 4-24 Standardized Estimates (Without Mediator) ...................................... 162
Table 4-25 Standardized Path Estimates (with mediator variables) ...................... 164
Table 4-26 Results of Standardized Indirect Effect Test on Investment Behavior through Attitude ..................................................................................................... 165
Table 4-27 Results of Standardized Direct Effect Test on Investment Behavior through Attitude ..................................................................................................... 165
Table 4-28 Summary of Mediation Results ......................................................... 166
Table 4-29 Summary of Hypothesis Testing ......................................................... 168
Table 5-1 Results of Model Testing ..................................................................... 178
Table 5-2 Mediation Effects Results ..................................................................... 195
