

ACKNOWLEDGEMENTS

“From the depth of my heart I thank God for the wisdom, perseverance and strength that he has bestowed upon me during this research project, and indeed, throughout my life.”

The journey of doctoral program had its highs and lows; yet, I am lucky to have enormous support of so many individuals and here I take the opportunity to say ‘thank-you’ to everyone.

At the outset, I would like to express my sincere gratitude to my research guide, Dr. N. Udupa, Professor and Principal, MCOPS for his valuable guidance, scholarly inputs and consistent encouragement during the entire research work. This feat was mainly possible because of the unconditional support provided by him. He has always made himself available to clarify my doubts despite his busy schedules and I consider it as a great opportunity to pursue my doctoral programme under his guidance and to learn from his research expertise. Thank you Sir for all your guidance and support.

I would also like to wish my deepest gratitude to my research co-guide Dr. M. Sreenivasa Reddy, Professor and HOD, Dept. of Pharmaceutics, MCOPS for his all guidance, suggestions, motivation throughout the research project as well as for his painstaking effort and attention to the details while drafting the thesis. Indeed, without his guidance, I would not be able to put this thesis together. Thank you Sir.

I take this opportunity to sincerely acknowledge the Nanomission Council, Dept. of Science and Technology, Government of India, New Delhi, for providing financial assistance in the form of Senior Research Fellowship which buttressed me to perform my research work comfortably.

My sincere appreciation and thanks to the senior researchers of our group, Dr. Ranjith Kumar, Dr. Srinivas Mutalik and Dr. Prashant Musmade for their enthusiasm, valuable guidance, encouragement, support and help in several research techniques. I am grateful to them and hope to keep up our pleasant association in the future.

My gratitude to all the faculty members of MCOPS including Dr. C. Mallikarjuna Rao, Dr. C. S. Sreedhara, Dr. Krishnamurthy Bhat, Dr. J. Venkat Rao, Dr. K. B. Koteswara, Dr. Gautham Shenoy, Dr. Veerendra, Dr. Sreedhar, Dr. Manthan, Dr. Jagadish, Mr. Pradeep, Mr. Girish Pai and Dr. Shaila Lewis, for their support and encouragement during various phases of my Ph.D. work.

My sincere thanks go to Mr. Sreedhar Prabhu, In-charge, Central Animal Research Facility, Manipal University for not only providing me the animals to carry out *in vivo* experiments but also for all the help during the experiments on rabbits.

Most of the results described in this thesis would not have been obtained without a close collaboration with few laboratories. I owe a great deal of appreciation and gratitude to Dr. Soney Varghese, Nano and Display Research Laboratories, Department of Chemistry, National Institute of Technology, Calicut for SEM and AFM analysis, Ms. Susan Mani, Division of Implant Biology (TEM), Sree Chitra Tirunal Institute for Medical Sciences and Technology, Thiruvananthapuram for TEM analysis, Mr. Pramod Tamhane, S. P. Consultants, Mumbai for surface area analysis and Dr. B.S. Thippeswamy, S.S. College of Pharmacy, Tumkur for helping me to carryout pharmacodynamic studies of my developed formulations. My heartfelt thanks are also due to Dr. C. Shivakumara, Solid State and Structural Chemistry Unit, Indian Institute of Science, Bangalore for XRD analysis.

I can never forget the wonderful time that I have spent with the fellow research scholars (past and present) of MCOPS. I would like to extend huge and warm thanks to Dr. Gopal, Dr. Usha, Dr. Karthik, Aravind, Omprakash, Sidhartha, Dr. Thiyagu, Dr. Anup, Bhagwati, Kranti, Naseer, Aasmi, Kiran, Misraji, Chethan, Roopesh, Pallavi, Pawan, Nitesh, Swapnil, Ganesh, Dharendra, Vijaykumar, Anil, Cinu, Angel, Prashant Bhide and many others for their stimulating discussions, and for all the fun we have had during my PhD period. Guys, thanks for being so cheerful that made my difficult times seem so easy.

My dear friends from MLSC, Dr. Kiran, Dr. Sunil, Prabhu, Raghu, Goutham and others, have been the most encouraging and helpful friends I ever had! I am particularly grateful to Dr. Kishore, for taking the time to proof read first-draft of this thesis. Kishoregaru, your inputs were invaluable.

My special thanks to Samata and Anup for their timely help in sending me the full-text articles that I could not directly access from Manipal. Your contribution in the successful completion of this thesis is immense. Thanks again for all your help.

I have been lucky to be surrounded by many other intelligent and thoughtful people around me. In particular, I am grateful to Dr. Shrikant, Dr. Sunil Agnihotri, Bommakanti, Amol, Prasad Joshi, Shailesh Kulkarni, Imran, Dr. Prasad Patil and Dr. Shriram Pathak for their expertise. Despite the distance, each of them helped me work through my ideas. I am extremely grateful for their intellectual input into this project.

I wish to express my warm thanks to Jayashri, Rajani, Ramesh, Shobha, Vijay Raghavan, Divya, Pundalik Bhat, Krishna Prabhu, Vanamala Shetty, Suma and staff of office, accounts and stores for their support and timely help.

I would like to thank Shivananda, Divakar, Panduranga, Samanth, Shwetha, Shreekala, Jagadish, Umesh and all other non-teaching staff members of MCOPS, for their timely help and support.

Thanks must also go to my junior colleagues Trilok, Nidhish, Tushar, Ganesh, Amit, Pushkar, Asim, Sneha, Santoshi, Shivaji, Deepti, Neelam, Shilpi, Jyotsna, Prerana, Bobby,

Sunethra, Ramya and others for their wonderful company and timely support. Thanks a lot guys for creating such an energetic and enjoyable ambiance in the lab.

I convey my profound regards to Dr. V. H. Kulkarni and family for their concern and enthusiastic support since from my B. Pharm days.

My dearest brother Prasad and dearest sister Preeti have been a source of immense strength and support during my research tenure. Their motivation and strong support has helped me to surmount difficulties and has renewed hope in me during tough times. I express my gratitude to brother-in-law Rajesh and sister-in-law Akshata for boosting up my moral and not letting me down anytime. It is also very pleasure to express feelings for my fiancée, Amrita, for always believing in me, and for motivating me to complete my dissertation and move on to bigger and better things. Thank you Amrita for bearing with my whining and my mood swings during my writing period. Also, I acknowledge my grandparents and relatives for their assurance and good-will in every way.

With sincere gratitude, I would like to devote this thesis to my parents. I feel truly blessed to have great parents who have worked so tirelessly just to see me happy. They have showered upon me immense love and have always supported me through the ups and downs of my life. I would not have been what I am today without you, dearest Aai and Baba. To Aai, whose face is wrinkled by struggle... whose heart is my refuge..... and whose life is my blessing....., your love and support has always given me the strength to face difficult times. A special gratitude to Baba who always believed in my abilities and for his constant encouragement in everything I do. I owe everything to them.

In last, I would like to thank all those who have helped me directly or indirectly for my work and whose names I have unknowingly missed out, in making this thesis a worthy endeavour.

Praful B. Deshpande
