1.9.9 Water resource .................................................. 19
1.10 Review of literature ........................................... 19
1.11 Drought conditions in Iran ..................................... 21
1.12 Lowland and Upland rice ....................................... 21
1.13 Crop rotation and Ratooning in Mazandaran ................. 24
1.14 Research on the tissue culture of rice in Iran ................. 25
1.15 Objectives ..................................................... 27

CHAPTER 2: BIOGEOCHEMICAL CYCLES OF NUTRIENT ELEMENTS ....... 29

2.1 Response of crops to the fertilizer .............................. 29
2.2 The nitrogen cycle ................................................. 31
2.3 The phosphorous cycle .......................................... 33
2.4 The potassium cycle .............................................. 35
2.5 The zinc cycle .................................................... 36
2.6 The copper cycle ................................................ 38
2.7 The manganese cycle ............................................ 39
2.8 The iron cycle .................................................... 40
2.9 The ideal conditions of nutrients uptake ....................... 41
2.10 Ecosystem nutrients ........................................... 43
    2.10.1 Sustainable fertility ....................................... 44

CHAPTER 3: ANALYSIS OF THE WATER, SOIL AND PLANT IN THE FIELD ............................................................ 46

3.1 Analysis of soil for chemical and physical characteristics .... 46
    3.1.1 E.C and soil salinity ........................................ 47
3.1.2 pH ................................................................. 47
3.1.3 CaCO₃ ............................................................... 48
3.1.4 Organic carbon (O.C %) ........................................ 49
3.1.5 ESP and SAR ...................................................... 50
3.1.6 CEC and BS% .................................................... 51
3.1.7 Organic matter (O.M %) ........................................ 52
3.1.8 Soil texture ......................................................... 53
3.1.9 Clay minerals content ........................................... 55

3.2 Soil test for assessing nutrients status .......................... 56
3.2.1 Determination of N content in the soil sample ............... 56
3.2.2 Determination of P content in the soil sample ............... 56
3.2.3 Determination of K content in the soil sample ............... 57
3.2.4 Determination of Zn, Cu, Mn and Fe content in the soil sample ....................................................... 58

3.3 Physicochemical analysis of water sample ....................... 59
3.3.1 Total Hardness .................................................... 59
3.3.2 Determination of carbonate content in the water (CO₃) .... 59
3.3.3 Determination of bicarbonate content in the water (CO₃H) .. 59
3.3.4 Determination of pH of water sample ......................... 60
3.3.5 Determination of E. Conductivity of water ................... 60
3.3.6 Total dissolved solids (TDS) in water ......................... 60
3.3.7 Sodium Adsorption Ratio (SAR) of water .................... 60
3.3.8 Potassium content in water .................................... 61
3.3.9 Sodium content in water ...................................... 61
CHAPTER 5: RICE GRAIN YIELD AND ITS RELATIONSHIP WITH PLANT PHYSIOLOGICAL CHARACTERISTICS  

5.1 Yield and the number of tillers 
5.1.1 Relation with soil pH 
5.2 Yield and plant height 
5.2.1 Relation with soil pH 
5.3 Yield and panicle length 
5.3.1 Relation with soil pH 
5.4 Yield and the number of seeds per panicle 
5.4.1 Relation with soil pH 
5.5 Relationship between soil pH, yield and physiological parameters 
5.5.1 Comparison between the maximum yield per class 
5.6 Yield and grain weight 
5.7 Conclusions 

CHAPTER 6: NUTRIENT CONTENTS IN LEAVES AND GRAINS OF RICE PLANT  

6.1 Role of nitrogen in rice plant growth 
6.1.1 Deficiency symptoms of nitrogen in rice plant 
6.1.2 Toxicity symptoms of nitrogen in rice plant 
6.1.3 Nitrogen fertilizer in Mazandaran 
6.2 Role of phosphorous in rice plant growth 
6.2.1 Deficiency symptoms of phosphorous in rice plant 
6.2.2 Toxicity symptoms of phosphorous in rice plant
6.2.3 Phosphorous fertilizer in Mazandaran

6.3 Role of potassium in rice plant growth
   6.3.1 Deficiency symptoms of potassium in rice plant
   6.3.2 Toxicity symptoms of potassium in rice plant
   6.3.3 Potassium fertilizer in Mazandaran

6.4 Role of zinc in rice plant growth
   6.4.1 Deficiency symptoms of zinc in rice plant
   6.4.2 Toxicity symptoms of zinc in rice plant
   6.4.3 Zinc fertilizer in Mazandaran

6.5 Role of copper in rice plant growth
   6.5.1 Deficiency symptoms of copper in rice plant
   6.5.2 Toxicity symptoms of copper in rice plant
   6.5.3 Copper fertilizer in Mazandaran

6.6 Role of manganese in rice plant growth
   6.6.1 Deficiency symptoms of manganese in rice plant
   6.6.2 Toxicity symptoms of manganese in rice plant
   6.6.3 Manganese fertilizer in Mazandaran

6.7 Amylose and protein in grain

6.8 Macronutrients content in grain

6.9 Micronutrients content in leaves and grains
   6.9.1 Micronutrients content in grain
   6.9.2 Micronutrients content in leaves

6.10 Enriched grain with nutrients
