

LIST OF TABLES

| TABLE NO. | DISCRIPTION | PAGE NO. |
|-----------|--|----------|
| 4.1 | Mean and SD Values of 16 classified groups on 7 measures of study habits and 4 measures of Youth Problems. | 80 |
| 4.2 | Complete Summary of 4 Way <i>ANOVA</i> of CO data of 2x2x2x2 factorial design. | 81 |
| 4.3 | Intergroup Mean Differences between 16 classified groups for the factor of concentration (CO). | 83 |
| 4.4 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Planning of subjects). | 84 |
| 4.5 | Showing Inter-group mean differences of SP's score for the 16 classified groups. | 86 |
| 4.6 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Preparation for Examination [PE]). | 87 |
| 4.7 | Showing Inter-group mean differences between 16 classified groups on PE measure | 88 |

contd...

| TABLE NO. | DISCRIPTION | PAGE NO. |
|-----------|---|----------|
| 4.8 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Factor-general habits and interests [HI]) | 89 |
| 4.9 | Inter-group mean differences between 16 classified groups on HI measure (DNMRT Results). | 90 |
| 4.10 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (School environment [S.A.]) | 92 |
| 4.11 | Inter-group mean differences of 16 classified groups (School environment data) | 93 |
| 4.12 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Home environment [HE]). | 94 |
| 4.13 | Showing Inter-group mean differences between means of 16 classified groups for Home Environment data. | 95 |
| 4.14 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Reading and notes taking). | 96 |
| 4.15 | Inter-group mean differences of 16 classified groups (Reading and Notes taking) | 97 |

contd.....

| TABLE NO. | DISCRPTION | PAGE NO. |
|-----------|--|----------|
| 4.16 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Family problems [A]). | 98 |
| 4.17 | Inter-group mean differences of classified groups for DNMRT (Family problems) | 99 |
| 4.18 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Preparation for Examination [PE]). | 100 |
| 4.19 | Inter-group mean differences of classified groups for school and college problem data. | 101 |
| 4.20 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Social problems). | 102 |
| 4.21 | Inter-group mean differences of 16 classified groups on social problem data. | 103 |
| 4.22 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Personal problems and over sensitivity). | 104 |
| 4.23 | Inter-group mean differences of 16 classified group means for personal problem and oversensitivity data. | 104 |

| TABLE NO. | DISCRIPTION | PAGE NO. |
|-----------|--|----------|
| 4.16 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Family problems [A]). | 98 |
| 4.17 | Inter-group mean differences of classified groups for DN MRT (Family problems) | 99 |
| 4.18 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Preparation for Examination [PE]). | 100 |
| 4.19 | Inter-group mean differences of classified groups for school and college problem data. | 101 |
| 4.20 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Social problems). | 102 |
| 4.21 | Inter-group mean differences of 16 classified groups on social problem data. | 103 |
| 4.22 | Complete summary of 4 way <i>ANOVA</i> for a balanced 2x2x2x2 factorial design (Personal problems and over sensitivity). | 104 |
| 4.23 | Inter-group mean differences of 16 classified group means for personal problem and oversensitivity data. | 104 |
