CHAPTER 1

INTRODUCTION

1.1 Antarctica the "Seventh Continent"

1.1.1 Antarctica Treaty System

1.1.2 The Madrid Protocol

1.2 India in Antarctica

1.2.1 Dakshin Gangotri

1.2.2 Indian Permanent Research Station "Maitri"

1.3 Environmental Impact in Antarctica

1.3.1 Contamination from Sewage

1.4 Ecological Effect of Sewage Discharge in Marine Environment in Antarctica

1.5 Why Wastewater Treatment and Management is Critical in Antarctica

1.5.1 Problems for Waste Treatment and Management in Antarctica

1.6 Significance of Present Study

1.7 Criterion for Selection of Wastewater Treatment System

1.8 Wastewater Treatment Systems

1.8.1 Lagooning in Oxidation Pond

1.8.2 Activated Sludge Treatment

1.8.3 Modified Aeration

1.8.4 Dispersed Growth Aeration

1.8.5 Contact Stabilization

1.8.6 High Rate Aerobic Treatment

1.8.7 Tricking Filtration

1.8.8 Spray Irrigation

1.8.9 Wet Combustion

CHAPTER 2........................................................................................................40

METHODOLOGY, SIMULATION AND PREDICTION ................................................................40

2.1 Methodology .................................................................................................40

2.2 Approach to Identify Problems .....................................................................40

2.3 Assessment of Water Abundance at Priyadarshini Lake ................................41

2.3.1 Area Measurement ....................................................................................41

2.3.2 Depth Measurement and Volume of Lake ..................................................42

2.3.3 Additional Feed Water Measurement .......................................................42

2.4 Waste Generation ..........................................................................................43

2.4.1 Sources of Gray Water in Maitri ..............................................................43

2.4.2 Liquid Waste Disposal and it's Consequences .........................................43

2.4.3 Solid Waste Contamination in Lake .........................................................44

2.5 Establishment of Environmental Laboratory at Maitri .................................45
WATER CHARACTERIZATION IT'S PREDICTION AND EFFICACY IMPROVISATION OF RBC

3.1 Lake System around Maitri Station
   3.1.1 Significance of Earlier Study

3.2 Water and Wastewater Sample Analysis during Various Expeditions by Expedition Member (1994 and 1995)

3.3 Results
   3.3.1 Water Characteristics of Priyadarshini Lake, Glacial and Control Lakes around Maitri Station
      3.3.1.1 pH
      3.3.1.2 Turbidity
      3.3.1.3 Temperature
      3.3.1.4 Conductivity
      3.3.1.5 Alkalinity
      3.3.1.6 Total Hardness
      3.3.1.7 Calcium Hardness
      3.3.1.8 Total Dissolved Solids (TDS)
      3.3.1.9 Total Suspended Solids
      3.3.1.10 Chloride
      3.3.1.11 Sulfate
      3.3.1.12 Nitrate
      3.3.1.13 Ammonia and Nitrite
      3.3.1.14 Total Phosphate
      3.3.1.15 Dissolved Oxygen
      3.3.1.16 Biochemical Oxygen Demand (BOD)
      3.3.1.17 Chemical Oxygen Demand (COD)
      3.3.1.18 Total Organic Carbon (TOC)
      3.3.1.19 Oil and Grease and Hydrocarbon
      3.3.1.20 Sodium and Potassium
      3.3.1.21 Cadmium
      3.3.1.22 Copper
      3.3.1.23 Chromium
      3.3.1.24 Lead
      3.3.1.25 Iron
3.3.1.26 Manganese ................................................................. 79
3.3.1.27 Zinc ........................................................................... 79
3.3.2 Wastewater Analysis of RBC at Maitri Station ....................... 80
  3.3.2.1 pH ........................................................................... 80
  3.3.2.2 Suspended Solids .......................................................... 81
  3.3.2.3 Chloride ...................................................................... 81
  3.3.2.4 Sulfate ....................................................................... 81
  3.3.2.5 Phosphate ................................................................... 81
  3.3.2.6 Ammonia .................................................................... 82
  3.3.2.7 Nitrite ......................................................................... 82
  3.3.2.8 Nitrate ....................................................................... 82
  3.3.2.9 Biochemical Oxygen Demand .......................................... 83
  3.3.2.10 Chemical Oxygen Demand ............................................ 83
  3.3.2.11 Oil and Grease .............................................................. 83
  3.3.2.12 Hydrocarbon ............................................................... 83
  3.3.2.13 Cadmium ................................................................... 84
  3.3.2.14 Copper ..................................................................... 84
  3.3.2.15 Chromium .................................................................. 84
  3.3.2.16 Lead ........................................................................ 84
  3.3.2.17 Iron .......................................................................... 85
  3.3.2.18 Zinc ......................................................................... 85

3.4 Rotating Biological Contactor at Maitri ........................................... 86
  3.4.1 Design Features of RBC — Installed at Maitri ......................... 87
    3.4.1.1 Primary Settlement, Sludge Storage and Digestion Zone .......... 87
    3.4.1.2 Biozone ..................................................................... 88
    3.4.1.3 Discs and Drive ............................................................ 88
    3.4.1.4 Secondary Settlement and Sludge Storage Zone ....................... 89

3.5 Present Operational Conditions ..................................................... 90
  3.5.1 Collection and Storage Pond ............................................... 91
  3.5.2 Effluent Discharge and Priyadarshini Lake Contamination .......... 91

3.6 Water Balance at “Maitri” Station .................................................. 93
  3.6.1 Water Intake System ......................................................... 93
  3.6.2 Distribution of Water ........................................................ 93
3.6.3 Wastewater Production

3.7 Priyadarshini Lake Water Assessment

3.7.1 Volume of the Lake

3.8 Water Sample Collection and Analysis around Maitri (Year 2000 and 2004)

3.8.1 Water Sample Analysis in the Year 2000

3.8.2 Water Sample Analysis in the Year 2004

3.9 Characteristics of Wastewater Generation at Maitri

3.10 Wastewater flow Rates and Composition

3.11 Wastewater Sample Analysis of RBC

3.12 Efficacy Improvisation at Site

3.12.1 Tertiary Treatment of Wastewater at Site

3.13 Results

3.13.1 Priyadarshini Lake Water Assessment

3.13.2 Water Characteristics of Lakes around Maitri Station

3.13.2.1 Turbidity

3.13.2.2 Temperature

3.13.2.3 Conductivity

3.13.2.4 Alkalinity

3.13.2.5 Total Hardness

3.13.2.6 Calcium Hardness

3.13.2.7 Chloride

3.13.2.8 Total Dissolved Solids (TDS)

3.13.2.9 Total Suspended Solids

3.13.2.10 Sulfate

3.13.2.11 Nitrate

3.13.2.12 Total Phosphate

3.13.2.13 Dissolved Oxygen

3.13.2.14 Biochemical Oxygen (BOD) Demand

3.13.2.15 Chemical Oxygen Demand (COD)

3.13.2.16 Oil and Grease and Hydrocarbon
