I would like to thank my supervisor Dr. C. Gnanaseelan who arouses my interest to do Ph. D. during my M. Tech. (Atmospheric Physics) project under his guidance. His expertise, understanding, and advices were essential for the realization of this work. He guided me throughout the course of my Ph. D. degree by always giving me the necessary freedom for developing new ideas. His motivation and encouragement always helped me to stay on track and complete my thesis work in time. I am always thankful to him for his love and affection.

I express my deep sense of gratitude to Dr. (Mrs.) P. S. Salvekar (Head, T. S. Division) and Dr. P. S. Polito (Instituto Oceanografico da Universidade de Sao Paulo (IOUSP), Brazil) for their constant encouragement, valuable support and suggestions to carry out this work. I am really thankful for their invaluable love, affection and blessing, which they have given to me. This thesis wouldn't have been possible without their support and the directions during the course.

I am thankful to Dr. B. N. Goswami, Director, IITM and Dr. G. B. Pant, Ex-Director and for providing all the necessary facilities at IITM. Working in IITM has been a nice experience to me. I would also thank the staff of IITM library and computer division for their excellent support. I am also thankful to all IITM scientists who helped me directly or indirectly.

My sincere thanks to Dr. P. Pradeep Kumar (Head, Department of Atmospheric and Space Science), Dr P. N. Sen, Dr. Kala Raj madam, Dr. S. K. Sinha, M. K. Tondon and Dr. Sinha Ray for their love, support and encouragement for me.

I am grateful to the various institutions or organizations and websites for supplying various mathematical techniques and providing different datasets. Without their help it would not have been possible to undertake this study.
It is my pleasure to acknowledge co-operation and help, I received from my friends Bijoy, Chowdary, Deepa, JayaKumar, Pramod, Rahul, Medha, and Umesh from T. S. Division and I also acknowledge especially my friend Mishra from FSU and Kamala from IITM. I would like to acknowledge all the staff of T. S. Division for their immense help during the course of my work. I am thankful to Mr. Kawde and Mr. Rajesh of T.S. Division who are very helpful with administrative works and security staff of IITM for support.

I acknowledge, Prof. J. P. McCreary, Dr. D. Sengupta, Dr. D. Shankar, Dr. R. H. Kriplani, Dr. R. Krishnan, Dr. A. K. Sahai, Dr. Gary Meyer, Dr. Patrick Caldwell, Dr. Daryl Metters, Dr. Mick Spillane, Dr. Maithili Sharan, Dr. B. Subrahmaniam, A. Parekh and Dr. Prince K. Xavier for the scientific discussions and help. I thank all my friends for their help and co-operation through out my stay in IITM.

Special thanks to my Father (Sh. Bakshi Prem Saroop Vaid), Mother (Smt. Bimla Sharma) and other members of my family (Neeraj and Shashi Pal Mehta, Supriya Mehta, Deeraj Vaid, Bakshi Shivdeep Vaid), for their best support and care. Many thanks to my God for his blessing and all time care. I dedicate this thesis to Ma Vaishnodevi.

(BAKSHI HARDEEP VAID)
Several softwares and data sets were used extensively in this thesis work. I acknowledge the institute/persons for providing the software/datasets.

- The NCEP-NCAR datasets were obtained from ‘http://ingrid.ldeo.Columbia.edu/sources/.noaa/.ncep-ncar/.cdas-1’.
- The QuikSCAT scatterometer gridded wind data were obtained from IFREMER through their site ‘ftp://ifremer.fr’.
- The Grid Analysis and Display System (GrADS) is used for preparation of figures for thesis work ‘http://www.iges.org/grads/’.
- Data visualization software FERRET developed at the Pacific Marine Environmental Laboratory, Seattle, WA, U. S. A. was also used for generating the figures.
- Topex/Poseidon sea surface height anomaly data set was obtained from AVISO ‘http://las.aviso.oceanobs.com’.
- TMI Sea surface data obtained from ‘http://www.ssmi.com/tmi/ tmi_browse.html’.
- Daily Reynold SST obtained from ‘ftp://eclipse.ncdc.noaa.gov/pub/OI-daily/NetCDF/’
- HADISST data was provided by UK Met Office through their web site ‘http://badc.nerc.ac.uk/data/hadisst’.
- SODA data is University of Maryland reanalysis product obtained from ‘http://iridl.ldeo.columbia.edu/SOURCES/.CARTON-GIESE/.SODA’
- Bouy data obtained form National Data Buoy Programme, NIOT, Chennai under the Department of Ocean Development.
- Flux data obtained from ‘http://oaflux.whoi.edu/’
- Daily OLR from satellite obtained from ‘http://www.cdc.noaa.gov/cdc/’
- Tide Gauge sea level data obtained from Dr. Gary Meyer, Dr. Patrick Caldwell, Dr. Daryl Metters.
