# Table of Contents

List of abbreviations  i-iii

**Chapter 1**

General Introduction  1-37

**Chapter 2A**

Effect of growth conditions on the concentration and composition of phospholipid fatty acids (PLFA) of some marine bacteria  38-62

**Chapter 2B**

Effects of environmental contaminant, tributyl tins (TBT) on the PLFA concentration and composition of some bacteria  63-74

**Chapter 2C**

Effect of cultivation period, nutrients and incubation temperature on the PLFA concentration and composition of the marine microalgae  75-93

**Chapter 3**

Sources of organic matter and microbial community structure in the sediments of the Visakhapatnam harbour, east coast of India and Mandovi-Zuari estuaries, west coast of India  94-129

**Chapter 4**

Distribution and fate of fatty acids in sediment cores from the Indian Ocean  130-161

**Chapter 5A**

Microbial degradation of alkenones: Implications for paleotemperature reconstruction.  162-191

**Chapter 5B**

Evidence of selective bacteria-induced and auto-oxidative degradation of alkenones during dark incubation of non-axenic *Emiliania huxleyi* cells  192-213

**Chapter 6**

Summary  214-226

**Chapter 7**

References  227-260
