1.2.3.2.6. Past work done on Delonix elata
1.2.4. Aim and Objective of the Current Study 60-64
1.2.4.1. Selection of the plant species 61
1.2.4.2. Proposed work on preliminary phytochemical examination
1.2.4.3. Proposed work on biological activities 63-73
1.2.5. References 65

CHAPTER - II Phytochemistry of Alangium salviifolium, Croton bonplandianum, Acalypha indica & Delonix elata 74
2.1. Introduction 74
2.1.1. Secondary metabolites used as Drugs 75
2.1.2. Extraction Methods 86
2.1.3. Chromatography 88
2.2. Plant Material Collection and Authentication 91
2.3. Extraction Process 92
2.3.1. Fractionation of methanolic extract 92
2.4. Qualitative Phytochemical screening 93
2.5. Procedure for Thin Layer Chromatography 101
2.6. Results and Discussion 102
2.7. References 114

CHAPTER - III Anti-Inflammatory Activity 116
3.1. The Inflammatory Process 116
3.1.1. Types of inflammation 116
3.1.1.1 Acute inflammation 117
   a. Localized response 117
   b. Systemic acute – phase response 120
3.1.1.2. Chronic Inflammation 120
3.2. Various methods used in the study of anti-inflammatory activity 121
3.2.1. Acute Methods
3.2.1.1. Carrageenan induced paw oedema in rats
3.2.1.2. Egg-white induced pedal inflammation
3.2.1.3. Arachidonic acid induced ear oedema assay
3.2.2. Chronic Methods
3.2.2.1. Formaldehyde-induced inflammation
3.2.2.2. Induction of type II collagen induced arthritis
3.2.2.3. Heat Killed *Mycobacterium tuberculosis* adjuvant-induced arthritis in rat
3.2.2.4. Freund's adjuvant induced arthritis in rats
3.3. Apparatus available for measuring oedema
3.4. Anti-Inflammatory Agents
3.4.1. Corticosteroids
3.4.2. Non-steroidal Anti-inflammatory Drugs
3.4.2.1. Influence Of Standard Drug Ibuprofen On Inflammation
   a) Structure
   b) Metabolism
   c) Uses
   d) Side effects
3.4.3. Disease Modifying Anti-Rheumatoid Drugs
3.5. Some Plants with Anti-Inflammatory Activity
3.6. Effect of the extracts of *Alangium salviifolium*, *Croton bonplandianum*, *Acalypha indica* and *Delonix elata* on carragenan-induced paw oedema in Rats.
3.6.1. Aim
3.6.2. Materials
3.6.2.1. Animals
3.6.2.2. Sample preparation
3.6.3. Methodology

3.6.3.1. Acute toxicity studies 139
3.6.3.2. Anti-inflammatory activity 139
3.6.4. Statistical Analysis 142
3.6.5. Results 142
3.6.6. Discussion 154
3.7. References 156

CHAPTER - IV

Antimicrobial Activity of Alangium salviifolium, Croton bonplandianum, Acalypha indica & Delonix elata

4.1. Introduction 162
4.1.1. Major Groups of Antimicrobial Compounds from Plants 163
4.1.1.1. Phenolics and Polyphenols 163
4.1.1.1.1. Simple phenols and phenolic acids 163
4.1.1.1.2. Quinones 164
4.1.1.1.3. Flavones, flavonoids, and flavonols 165
4.1.1.1.4. Tannins 166
4.1.1.2. Terpenoids and Essential Oils 167
4.1.1.3. Alkaloids 168
4.1.2. Methods of Antimicrobial activity 181
a) Tube- Dilution Technique 181
b) Disk-Plate Technique 182
c) Cup-Plate Method / Well-Plate Method 182
4.1.3. Mode of Action of the Standard Antibiotics 182
a) Chloramphenicol 183
b) Griseofulvin 184
4.2. Antimicrobial activity of Alangium salviifolium, Croton bonplandianum, Delonix elata and Acalypha indica
4.2.1. Aim 185
CHAPTER V Investigation of In-vitro Anti-Arthritic Activity of *Alangium salviifolium*, *Croton bonplandianum*, *Acalypha indica* & *Delonix elata*

5.1. Introduction 211

5.1.1. Synonyms 212

5.1.2. Microorganisms Causing Septic Arthritis 212

5.1.3. Pathogenesis 214

a) Colonization and adherence of bacteria in joints 214

b) Joint infection and the host immune response 214

c) Joint damage 215

d) Bacterial products and their pathogenic role 216
e) Bacterial clearance versus joint damage 217

5.1.4. Risk factors 217

5.1.5. Symptoms 218

5.1.6. Diagnosis 218

5.2. Some Methods used for the evaluation of Anti-Arthritic activity 219

5.2.1. In-vitro anti-arthritic activity on arthritis causing microorganisms 220

5.3. Treatment 220

5.4. Anti-arthritic activity of *Alangium salviifolium*, *Croton bonplandianum*, *Delonix elata* and *Acalypha indica* 224

5.4.1. Aim 224

5.4.2. Materials 224

5.4.2.1. Test Organisms 224

5.4.2.2. Media Used 225

5.4.3. Methodology 226

5.4.3.1. Determination of Minimum Inhibitory Concentration (MIC) by Tube – Dilution Technique 226

5.4.3.1.1. Method 226

5.4.3.2. Determination of zone of inhibition by Cup-Plate Method 227

5.5.1. Result for *A. salviifolium* extracts 228

5.5.2. Result for *C. bonplandianum* extracts 231

5.5.3. Result for *D. elata* extracts 234

5.5.4. Results for *A. indica* extracts 235

5.5.5. Discussion 237

5.6. References 239

CHAPTER - VI In-vitro Anti-Diarrhea Activity of *Alangium salviifolium*, *Croton bonplandianum*, *Acalypha indica* & *Delonix elata* 245
6.1. Introduction 245
6.1.1. Pathogenesis 246
6.1.2. Diarrhoea causing Microorganisms 248
6.1.3. Symptoms of diarrhoea 248
6.1.4. Diagnosis 250
6.2. Methods for evaluating Diarrhea 251
6.2.1. Castor oil-induced diarrhea 251
6.2.2. Gastrointestinal motility test 251
6.2.3. PGE2-induced enteropooling 252
6.2.4. Castor oil-induced fluid accumulation 252
6.2.5. In-vitro anti-diarrheal activity 253
6.3. Treatment for Diarrhoea 253
6.3.1. Rehydration 253
6.3.2. Treatment recommended for some diarrhea-causing bacteria and protozoans 254
6.3.4. Some plants with Anti-Diarrhoeal activity 256
6.4. Anti-Diarrheal activity of *Alangium salviifolium*, *Croton bonplandianum*, *Acalypha indica* and *Delonix elata* 258
6.4.1. Aim 258
6.4.2. Materials 258
6.4.2.1. Test Organisms 258
6.4.2.2. Media Used 259
6.4.3. Methodology 259
6.4.3.1. Preparation of test and standard solutions 259
6.4.3.2. Preparation of media 259
6.4.3.3. Determination of Minimum Inhibitory Concentration (MIC) by Tube-Dilution Technique 260
6.4.3.4. Determination of zone of inhibition by Cup-Plate Method

6.4.4.1. Result for A. salviifolium extracts

6.4.4.2. Result for C. bonplandianum extracts

6.4.4.3. Result for D. elata

6.4.4.4. Result for A. indica

6.4.5. Discussion

6.5. References

General Discussion & Conclusion
