

LIST OF TABLES

Table No.	Table Description	P.No
3.1	mean (%) classification of proposed TCSFTU-CM algorithm on OuTex database with the dataset-1 of different block sizes.	35-36
3.2	mean (%) classification of proposed TCSFTU-CM algorithm on Granite database with the dataset-2 of different block sizes.	37-38
3.3	Comparison of the proposed TCSFTU-CM method with the other existing methods.	39
4.1	Results of texture classification using AFLRTU on VisTex Dataset-1 of first and second order features (1680 image regions).	48
4.2	Results of texture classification using AFLRTU on Brodatz texture Dataset-2 of first and second order features.	49
4.3	Results of texture classification using AFLRTU on Granite texture Dataset-3 of first and second order features.	50
4.4	Mean classification rates for the three different image datasets of proposed AFLRTU and other existing methods.	51
5.1	mean (%) classification results of the proposed SLBP method of Dataset-1 and Dataset-2.	66

5.2	Comparison of the proposed SULDP method with the other existing methods.	67
6.1	mean (%) image classification using energy features of OuTex Database.	77
6.2	mean (%) image classification using higher order statistical features of OuTex Database.	77
6.3	mean (%) image classification using energy features of Granite Database.	78
6.4	mean (%) image classification using higher order statistical features of Granite Database.	78
6.5	mean(%) image classification rate of selected features of two datasets.	79
6.6	Comparison of the proposed RLM-FLBP method with other existing methods.	80
