

## LIST OF TABLES

TABLE No.	TITLE	PAGE No.
4.1.	Age and sex of the selected diabetic subjects	79
4.2.	Educational qualification of the selected diabetic subjects	80
4.3.	Activity pattern of the selected diabetic subjects	81
4.4.	Type of the family of the selected diabetic subjects	81
4.5.	Monthly income levels of the selected subjects	82
4.6.	Age at the onset of diabetes	83
4.7.	Duration of diabetes	84
4.8.	Symptoms of the selected diabetic subjects	85
4.9.	Family history in relation to diabetes mellitus among the selected diabetic subjects	86
4.10.	Type of treatment taken by the selected diabetic subjects before and during the study period	88
4.11.	Exercise pattern of the selected diabetic subjects	89
4.12.	Time and duration of exercise of the selected diabetic subjects	90
4.13.	Complications of the selected diabetic subjects	91
4.14.	Frequency and quantity of alcohol consumption as expressed by the diabetic subjects	92
4.15.	Pattern of smoking among the male diabetic subjects	94
4.16.	Consumption pattern of coffee/ tea	95
4.17.	Mean height of the selected diabetic subjects	96
4.18.	Mean weight of the selected diabetic subjects	97
4.19.	BMI values of the selected subjects	98
4.20.	Waist / hip ratio of the selected diabetic subjects	99
4.21.	Food habits of the selected diabetic subjects	100
4.22.	Mean food intake of selected male subjects	101
4.23.	Mean nutrient intake of selected male subjects	102
4.24.	Mean food intake of selected female subjects	103

4.25.	Mean nutrient intake of selected female subjects	104
4.26.	Type of fats and oil used for cooking	105
4.27.	Consumption pattern of prepared/fast foods	106
4.28.	Mean fibre intake per day	107
4.29.	Mean acceptability scores of the onion juice, cinnamon bread, cumin seed masala chappathies, artichoke biscuits and okara sevai	109
4.30.	Mean acceptability scores of bayleaves chappathies, flaxseed bread, stevia leaves tea and jambolin seeds dosa	111
4.31.	Mean fasting, post prandial blood glucose and glycosylated haemoglobin level of selected diabetic subjects	113
4.32.	Mean lipid profile levels of the selected subjects	113
4.33.	Blood glucose levels of the selected diabetic subjects before and after supplementation with onion	115
4.34.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with onion	118
4.35.	Blood glucose levels of the selected diabetic subjects before and after supplementation with cinnamon powder	122
4.36.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with cinnamon powder	125
4.37.	Blood glucose levels of the selected diabetic subjects before and after supplementation with cumin seed	128
4.38.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with cumin seed	131
4.39.	Blood glucose levels of the selected diabetic subjects before and after supplementation with artichoke	135
4.40.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with artichoke	138
4.41.	Blood glucose levels of the selected diabetic subjects before and after supplementation with amla	141
4.42.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with amla	144
4.43.	Blood glucose levels of the selected diabetic subjects before and after supplementation with soyabean	148

4.44.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with soyabean	151
4.45.	Blood glucose levels of the selected diabetic subjects before and after supplementation with bay leaves	154
4.46.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with bay leaves	157
4.47.	Blood glucose levels of the selected diabetic subjects before and after supplementation with flaxseed	161
4.48.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with flaxseed	165
4.49.	Blood glucose levels of the selected diabetic subjects before and after supplementation with stevia leaves	168
4.50.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with stevia leaves	171
4.51.	Blood glucose levels of the selected diabetic subjects before and after supplementation with jambolin seed	174
4.52.	Serum lipid profile levels of the selected diabetic subjects before and after supplementation with jambolin seed	177

---

## LIST OF FIGURES

FIGURE No.	TITLE	PAGE No.
I	Blood glucose levels before and after supplementation with onion	116
II	Serum lipid profile levels before and after supplementation with onion	119
III	Blood glucose levels before and after supplementation with cinnamon	123
IV	Serum lipid profile levels before and after supplementation with cinnamon	126
V	Blood glucose levels before and after supplementation with cumin seed	129
VI	Serum lipid profile levels before and after supplementation with cumin seed	132
VII	Blood glucose levels before and after supplementation with artichoke	136
VIII	Serum lipid profile levels before and after supplementation with artichoke	139
IX	Blood glucose levels before and after supplementation with amla	142
X	Serum lipid profile levels before and after supplementation with amla	145
XI	Blood glucose levels before and after supplementation with soyabean	149
XII	Serum lipid profile levels before and after supplementation with soyabean	152
XIII	Blood glucose levels before and after supplementation with bay leaves	155
XIV	Serum lipid profile levels before and after supplementation with bay leaves	158
XV	Blood glucose levels before and after supplementation with flax seed	162

XVI	Serum lipid profile levels before and after supplementation with flax seed	166
XVII	Blood glucose levels before and after supplementation with stevia leaves	169
XVIII	Serum lipid profile levels before and after supplementation with stevia leaves	172
XIX	Blood glucose levels before and after supplementation with jambolin seed	175
XX	Serum lipid profile levels before and after supplementation with jambolin seed	178

---

## LIST OF PLATES

PLATE No.	TITLE	PAGE No.
I	Neutraceutical (onion, cinnamon, cumin seed) supplemented products	68a
II	Processing and preparation of artichoke biscuits	69a
III	Neutraceutical (amla) supplemented products	70a
IV	Processing of soya bean and preparation of okara sevai	71a
V	Neutraceutical (bay leaves, flaxseed) supplemented products	73a
VI	Neutraceutical (stevia leaves, jambolin seed) supplemented products	75a

## LIST OF APPENDICES

APPENDIX No.	TITLE
I	Height, weight and body mass index of the selected male diabetic subjects
II	Height, weight and body mass index of the selected female diabetic subjects
III	Initial and final values of control group (blood glucose and lipid profile)
IV	Initial and final values of experimental group (blood glucose and lipid profile)
