CONTENTS

PREFACE ............................................. i
ACKNOWLEDGEMENTS .................................. iv
DICTIONARY OF ABBREVIATIONS .................. vi
SYNOPSIS .......................................... vii

1. INTRODUCTION

1.I Non-linear phenomena in theoretical physics .......... 1
1.II Non-linear differential equations .......... 4
1.III Four dimensional non-linear theories .......... 17
1.IV Methods of exact solution .......... 38
1.V Integrability and Painlevé property .......... 58

2. SOLITARY WAVES IN DOUBLE SINH-GORDON SYSTEM

2.I The double sinh-Gordon equation ........ 63
2.II Solitary waves by the bilinear operator method .......... 68
2.III Multisolitary wave solutions .......... 71
2.IV Linear stability of solutions in 1+1 dimensions .......... 77
2.V Asymptotic behaviour of multisolitary wave solutions .......... 79
2.VI Topological charge .......... 82

3. SU(2) YANG-MILLS FIELDS WITH NO ENERGY TRANSFER

3.I Classical SU(2) Yang-Mills gauge theory .......... 84
3.II Application of the bilinear method .......... 91
3.III Yang-Mills fields with no energy transport .......... 94
4. COMPOSITE MAPPING METHOD FOR GENERATION OF SOLUTIONS IN THE KLEIN-GORDON FAMILY

4.I Relationships between KG type equations ........ 100
4.II Solution of $\phi^4$ equation by bilinear operator method ........ 101
4.III Maps from $\phi^4$ to sG and Liouville's equations ........ 105
4.IV The composite map: $\phi^4 \rightarrow sG \rightarrow sG$ ........ 108
4.V The composite map: $\phi^2 \rightarrow sG \rightarrow \phi^4$ ........ 111
4.VI Multisolitary wave solutions ........ 112
4.VII Discussion ........ 113

5. SYMMETRY CLASSIFICATION OF SOLUTIONS OF NON-LINEAR KLEIN-GORDON EQUATIONS

5.I The similarity approach ........ 115
5.II Similarity group of Klein-Gordon type equations ........ 117
5.III The ternary classification of solutions ........ 121
5.IV Examples of HRI solutions ........ 125
5.V Painlevé property ........ 128
5.VI Similarity group and base equation method ........ 130
5.VII Discussion ........ 132

6. TIME-DEPENDENT EXACT SOLUTIONS OF CLASSICAL SU(2) YANG-MILLS-HIGGS SYSTEM

6.II Similarity group of SU(2) YM-Higgs system ........ 136
6.III Time-dependent solutions ........ 140
6.IV Discussion ........ 144

Appendix ........ 145

REFERENCES ........ 146
