Acknowledgements

As I move towards the completion of my long cherished dream of doing a PhD, I realize that this dream is coming true because of tireless effort, help and blessings of a lot of people. It is pleasant feeling that it is time to express my gratitude towards all of them.

I’ll start by thanking the Lord, without His blessings I simply wouldn’t have been here. Another person to whom I would remain indebted throughout my life is my erudite Supervisor- Professor Gayatri Rath for her resolute guidance, meticulous supervision and constant encouragement during the entire course of my study. Besides being a great scientist she is a person with the heart of pure gold. I sincerely thank her for invaluable help and support.

I would like to take this opportunity to thank my Co-Supervisors, Prof. Ranju Railhan, Department of Biochemistry, All India Institute of Medical Sciences, Prof. Dinesh Bhatnagar, Department of Surgery, VMMC & Safdarjang hospital and Dr. Sandeep Mathur, Department of Pathology, AIIMS, for their critical evaluation and innovative ideas, which helped me in better understanding of my work.

I would like to express my sincere gratitude and thanks to Prof. R.K Suri, Dr. Vanita Gupta, Dr. Vandana Mehta, Dr. Jyoti Arora and Dr. Hitender Kumar for their constant support and valuable suggestions, which have helped me in improving my work. The guidance and critical evaluation of my SRC committee members are also gratefully acknowledged.

I would also like to acknowledge the support of some very special individuals. They helped me immensely by giving me encouragement and friendship. I consider myself very fortunate to have Dr. Ayan Dey, Dr. Ajay Matta, Dr. Garima and Dr. Simmi Soni as my friends and colleagues; their tremendous patience and above all infectious optimism were enough at times for me to tide over the disappointments and see a glimmer of hope in biggest of failures. I don’t have words to thank Mrs. Richa Tripathi, Mrs. Poonam, Dr. Sanchita, Dr. Ruchi, Dr. Yogesh, and Dr. Ashish for their constant support & encouragement.

I am thankful to Rajeshwar, Divya, Mushir, Subodh and Raj Singh and all the other departmental staff for their constant support, for cheering and “easing” the general atmosphere in the Department.

I am thankful to my seniors from the Department of Biochemistry, AIIMS- Dr. Jatinder Kaur, Dr. Rinu Sharma, Dr. BSA Raju, Dr. Anupam Kumar and Dr. Chhavi Sharma for their constant support and help whenever required. I wish to extend my warmest thanks to my juniors and colleagues from AIIMS- Dr. Jayadev, Dr. Sameer, Dr. Gayatri, Muzaffar, Satyendra, and Hassan for their
unconditional support. I would also like to thank Anand Jee, Gopal, Manish and Jagat for their invaluable assistance in completing my work.

The chain of my gratitude would be definitely incomplete if I forget to thank Mrs. Meenu Bala Solanki for her constant moral and technical support throughout my PhD.

Words are inadequate to express my indebtedness to my wife Shweta for her painstaking support, love and encouragement in every front of my life, without which this thesis would not have reached to its completion.

Last but not least, words fall short of gratitude as I owe to my parents for their encouragements, advice, support and above all standing by me through thick and thin.

It is a mammoth task at the end of so many years, to list and thank people who have helped me during the course of this study. I cannot possibly thank everybody by name but from the bottom of my heart I feel tremendously grateful to each and everyone who made my stay at VMMC worthwhile.

Finally yet importantly, I am immensely thankful to the Department of Biotechnology (DBT) and Council of Scientific and Industrial Research (CSIR) for the research funding and award of fellowship during my PhD.

Closing with regards

Chandra Prakash Prasad
