ACKNOWLEDGEMENT

It is my great privilege to express my sincerest gratitude to my esteemed teacher and guide Dr. C.S. Pande, Professor and Former Chairman, Department of Chemistry and Dean of Science Faculty, Himachal Pradesh University, Shimla (India) under whose supreme and enlightened guidance I have been able to accomplish this work. His keen interest, sympathetic attitude and constructive criticism have been a source of constant inspiration.

I am grateful to Dr. B.C. Verma, Professor and Chairman, Department of Chemistry, Himachal Pradesh University, Shimla, for providing me the necessary laboratory facilities and extending a helpful hand whenever needed. I extend my thanks to his research students especially, Dr. Devender, Mr. Vijay, Mr. Hari Krishan, Mr. Sudhir and Mr. Binder for their helpful suggestions in solving various analytical problems during the course of my research work.

The kind and co-operative attitude of Mr. Satwinder Mann and Miss Anjni Kaul is of no less importance. The research scholars, colleagues and other friends will always be remembered for their nice and pleasant company.

Thanks are due to Dr. A. Jayakrishan, of Sree Chitra Tirunal Institute for Medical Science and Technology,
Trivandrum for supplying us a cross-linked polymer 'hydrogel' as a research gift.

Above all, I wish to dedicate this work to my parents but for whose affection and constant inspiration this work would not have been possible. My special thanks are due to my brothers, Neetu and Bawa and affectionate Bhabhi Deepa. I am also indebted to Professor Romesh Dutt Sharma, Lecturer in Govt. College Mandi (H.P.), for inspiring me to work throughout my academic career.

Financial assistance provided by Himachal Pradesh University is thankfully acknowledged.

Last but not the least, I am thankful to Mr. Vinod K. Sharma for typing of this manuscript.
